KEY • **RETURN IT** not in use? back to the store - scanned in on the spot • **RESCAN IT** still in use? bring it past the counter - proof of existence • **30+ DAYS** shown in red - due for a return or a rescan

RED

**762 of the 1,257 units on hire (61%)** were issued in 2023–2025 and are still out - \$1,220,930 of equipment, the oldest for 1,296 days.

THE RULE

Share of on-hire units issued in prior years: Green under 10%, Amber from 10%, Red from 30%. Default lines - set at the top of the script.

OWNER

Andrew Fisher, Shutdown Manager - Coates tool store

NEXT ACTION AND BY WHEN

Every prior-year holder sent their list from this report by **09 Sep 2026**; returned or rescanned units drop off the next run.

Nine in ten completed radio and battery hires this year were back inside **7 days** - 12,088 completed hires in the transaction log (01 Jan to 02 Sep 2026), a 90th-percentile hold of 6.7 days, 52.7% back the same day.

**THE STORY.** \$1,800,663 of site radio equipment is on hire: 609 radios and 648 batteries. \$1,220,930 across 762 units has been out since 2023–2025, the oldest for 1,296 days. Not in use? Return it. Still in use? Bring it past the counter for a rescan.

**THE POSITION.** \$1,800,663 of site radio equipment is on hire per the SiteIQ pull as at 02 Sep 2026 18:30: **609 radios** and **648 batteries**. Of that, \$1,220,930 across **762 units** has been out since 2023–2025 - the oldest for **1,296 days**. Every one of those is working hard on site, sitting unused in a crib room or ute, or no longer accounted for; this report tells those three apart. **Not in use? Return it. Still in use? Bring it past the counter for a rescan.** Either way the record updates the moment it is scanned.

WHAT WE ARE ASKING - PLEASE READ FIRST

- Not in use? Return it to the Ampol Tool Store (Coates managed).**  
It is scanned in on the spot and comes straight off this report. Returned radios go back into the available pool for the next shutdown.
- Still in use? Bring it past the store for a rescan.**  
Proof of existence: a thirty-second scan verifies the unit is on site, in whose hands, and resets the record. Nothing is taken off you.
- Replacement value: radios \$2,695 each, batteries \$246 (new replacement price per Ampol\_ToolStore\_Pricing.xlsx).**  
Units that can be neither returned nor verified are ultimately chargeable at replacement value under the hire arrangement, applied consistently to all companies. Verification protects everyone from charges for equipment that is actually on site.
- Something look wrong? Tell the Ampol Tool Store.**  
We review and correct the record with you - no charge is finalised without that review.

These records are protected by daily stock takes (30-day full-coverage cycle, on-hire verification of the radio charging bays) and the double-check return process - every return is inspected and scanned on receipt, then stock-taken to its storage unit before going back on charge. **The moment a unit is scanned, the record updates.** Every count on this report is read from the SiteIQ register as at **02 Sep 2026 18:30** - nothing comes from a summary tab. Serial numbers: serial numbers from the radio register or the serial SiteIQ carries in the item description - 627 of the 634 radios on hire have one, 7 show a dash.

Since the last pull

No earlier register pull is saved in Data\previous yet - movement pull against pull starts with the next pull (button 28 parks the old export automatically).

The 24 hours before the pull - 01 Sep 2026 18:30 to 02 Sep 2026 18:30

**Issued 32** and **returned 55** radios and batteries across the counter in the 24 hours before the pull - every scan with its time, from the TRANSACTIONS export (CUSTOMER\_CONTRACTOR\_EQUIP). Company A to Z, then time.

Showing 25 of 87 movements (company A to Z, then time).

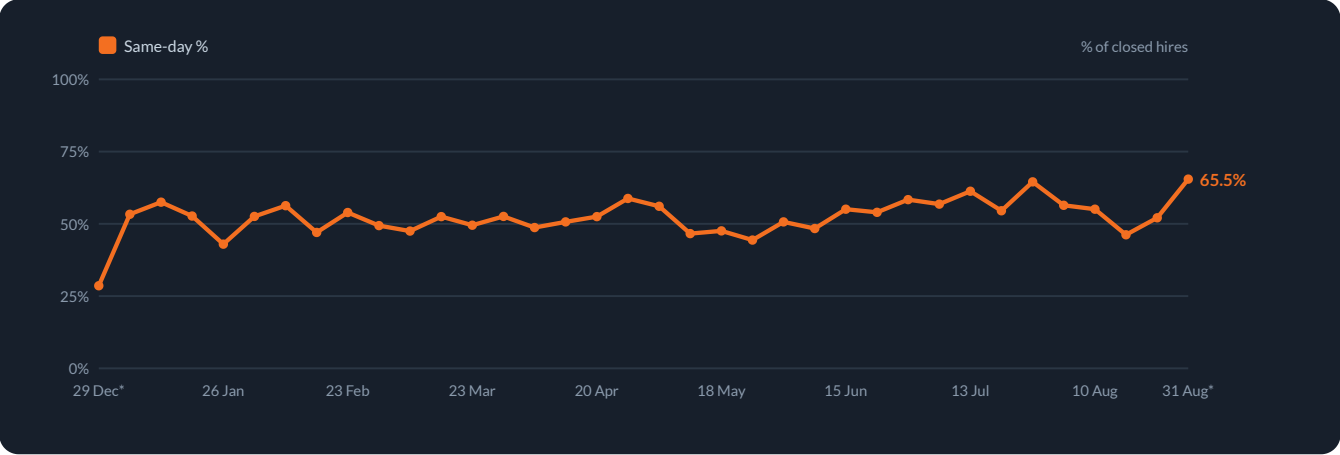

The year in movements

**THE YEAR SO FAR.** 12,582 issues and 12,088 returns of radios and batteries crossed the counter between 01 Jan to 02 Sep 2026 05:59 - every scan in the SiteIQ TRANSACTIONS export for the 1,418 barcodes on this report, laid out by ISO week. The busiest full week was the week of **22 Jun** (571 issues); the quietest full week was the week of **06 Apr** (194). Weeks marked \* are partial: the week of 29 Dec holds the log's first 4 days; the week of 31 Aug runs to 02 Sep 05:59.

Issues and returns by week - every movement, by the week it was scanned

Same-day returns by week - of that week's issues that have come back, the share back the same day

The weeks in numbers - net is issues less returns; a minus is a week more came back than went out

| WEEK    | ISSUES | RETURNS | NET | SAME DAY | WEEK   | ISSUES | RETURNS | NET | SAME DAY | WEEK    | ISSUES | RETURNS | NET | SAME DAY |
|---------|--------|---------|-----|----------|--------|--------|---------|-----|----------|---------|--------|---------|-----|----------|
| 29 Dec* | 8      | 2       | +6  | 29%      | 23 Mar | 334    | 325     | +9  | 50%      | 15 Jun  | 480    | 488     | -8  | 55%      |
| 05 Jan  | 264    | 202     | +62 | 53%      | 30 Mar | 301    | 282     | +19 | 53%      | 22 Jun  | 571    | 545     | +26 | 54%      |

Same-day % is the share of that month's closed hires back the day they went out. The last column is the change between the last two full months, Jul and Aug, in percentage points - green is up (more back the same day), red is down, as on the page-1 tiles. Sep\* holds the log's Sep movements only, up to 02 Sep 05:59. The 10 companies here account for 11,221 of the 12,582 issues; the other 33 companies are in the register pages, A to Z.

**So what.** Radios and batteries cross the counter about 366 times a week (the median full week), and 52.7% of this year's 12,088 completed hires came back the same day - the rest are the hires the 30-day rule watches. Between Jul and Aug the biggest rise in same-day returns was Wood (63.8% to 68.6%) and the biggest fall Cleanaway (74% to 2.6%).

Return windows by product

**HOW LONG A HIRE REALLY LASTS.** Every completed hire in the log - out and back - measured from the issue scan to the return scan, for the two products this report tracks. The median is the middle hire; the 90th percentile is the hold nine in ten hires were back inside. Days are decimal: 0.5 days is about 12 hours.

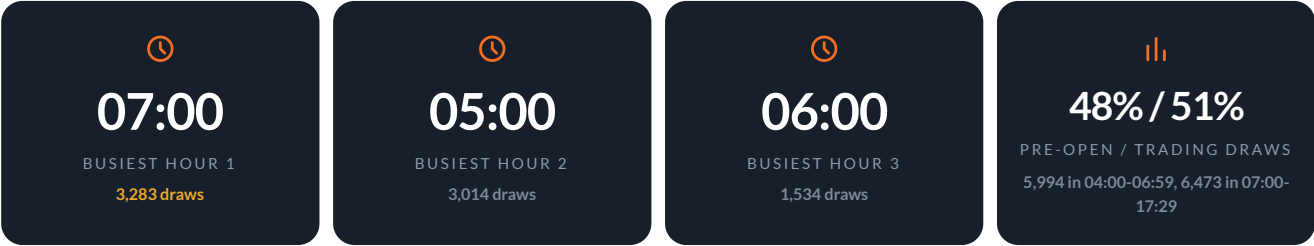

| PRODUCT                  | COMPLETED HIRES | MEDIAN (DAYS) | 90TH PERCENTILE (DAYS) | SAME DAY |
|--------------------------|-----------------|---------------|------------------------|----------|
| Radios                   | 1,008           | 0.4           | 37.0                   | 57.7%    |
| Batteries                | 11,080          | 0.5           | 5.9                    | 52.2%    |
| All radios and batteries | 12,088          | 0.5           | 6.7                    | 52.7%    |

Completed hires only - a unit still out has no return scan and no window yet. The engine pools any product with fewer than 10 completed hires: on this fleet that pool is 0 hires (0 radios, 0 batteries), already counted in the rows above. Products are this report's own radio and battery rule, each barcode classed by its register description.

**So what.** Half of all hires are back within 12 hours and nine in ten within 7 days; a unit out 30 days has been held 4 times longer than the 90th-percentile hold - the red on the register pages marks a real outlier, not a busy crew.

The counter's rhythm

**WHEN RADIOS MOVE.** Every draw and every return since 01 Jan laid on a week: **7,831 of the 12,582 draws (62%)** fall in the busiest three hours, Wed is the busiest weekday (2,680 draws), and weekdays carry **12,342** draws against **240** at the weekend.

## Who holds what

**THE 80/20. 578 people and accounts** hold the 1,257 radios and batteries on hire; **327** of them hold 80% of the units and **338** hold 80% of the \$1,800,663 on-hire value. Ranked by items held, the top 15 are below - the custody line is kept apart, as everywhere in this report.

| RANK | HIRER                                                        | COMPANY            | ITEMS | VALUE    | OLDEST (DAYS) | ALSO HOLDS            |
|------|--------------------------------------------------------------|--------------------|-------|----------|---------------|-----------------------|

Ranked by items on hire at the pull (02 Sep 2026 18:30); value at the prices on the data page, so the 578 holders add up to the on-hire value tile on page 2. "Also holds" reads the whole register: 187 of the 578 radio holders also hold gas monitors or tooling from the store, 187 of them in this top 15. Oldest is the longest-held unit in that holder's hands; 30 days or more shows in red.

**So what.** The top 15 holders have 202 units and \$216,224 between them - 16% of everything out - and 187 of them also hold gas monitors or tooling, so one conversation with each recovers more than radios.

What the log and the register disagree on

**TWO SOURCES, ONE FLEET.** The register is the position; the log is the history. Read together they show the counter's habits and any gap between them. Nothing here is corrected - it is shown, with the rule that found it: a hire closed inside **6 minutes** is a short hire; **15 or more** items drawn by one person or account inside one hour is a mass draw.

Hires closed inside 6 minutes - 76 this year; showing 10 (company A to Z, then time)

15 or more items by one hirer inside an hour: 3 by site accounts and 4 by named people - kits of batteries going out on a shutdown or after-hours account, and crew leads drawing for a whole crew. Habits to know about, not scan errors.

On hire with no movement since the log began - issued on or after 01 Jan 2026

No gap. Every unit the register shows on hire since 01 Jan 2026 has its issue scan in the log.

Issued before the log begins - on hire since before 01 Jan 2026

763 units on hire in the register were issued before the log starts, so their issue scan is history the export does not carry: 391 from 2023, 174 from 2024, 198 from 2025. That is the 762 units on hire since 2023–2025 on page 2 plus 1 unit in the out-of-service custody line, which page 2 keeps apart - the two counts reconcile exactly.

Available in the register with an open movement in the log

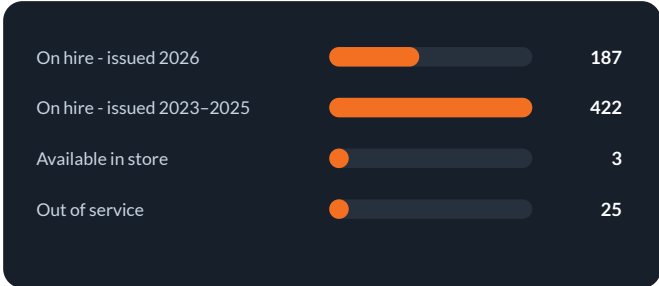

No gap. No unit the register shows available has an open movement in the log - every return scan reached the register.

**So what.** The log and the register agree: no unit is on hire without its issue scan since 01 Jan and no shelf unit has an open movement. The 76 short hires and 7 mass draws are counter habits, not errors to chase, and the 763 prior-year units are exactly the page-2 figure plus the custody line.

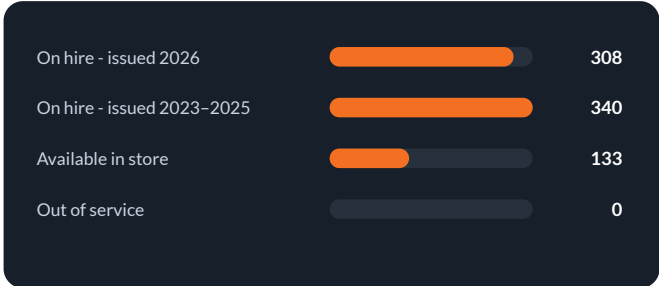

Fleet position at a glance

Three pictures of the same truth - where the fleet sits, who holds the value, and how long it has been out. Every count and dollar here comes straight from the register tables that follow; nothing is replaced or rounded.

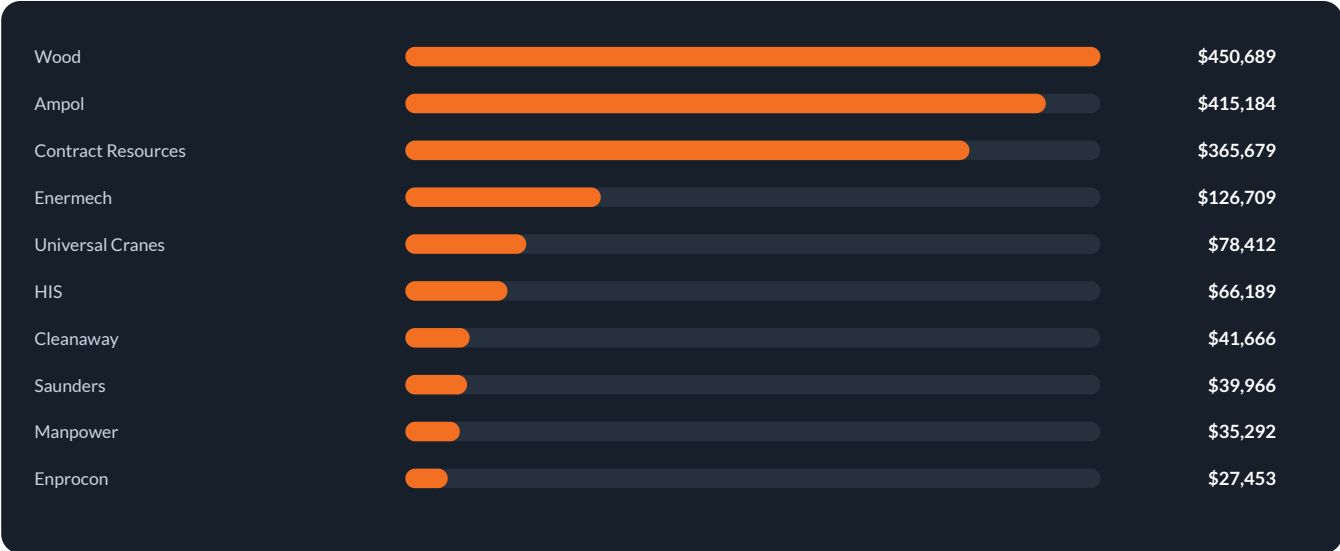

Site radios - 637 on the register

Radio batteries - 781 on the register

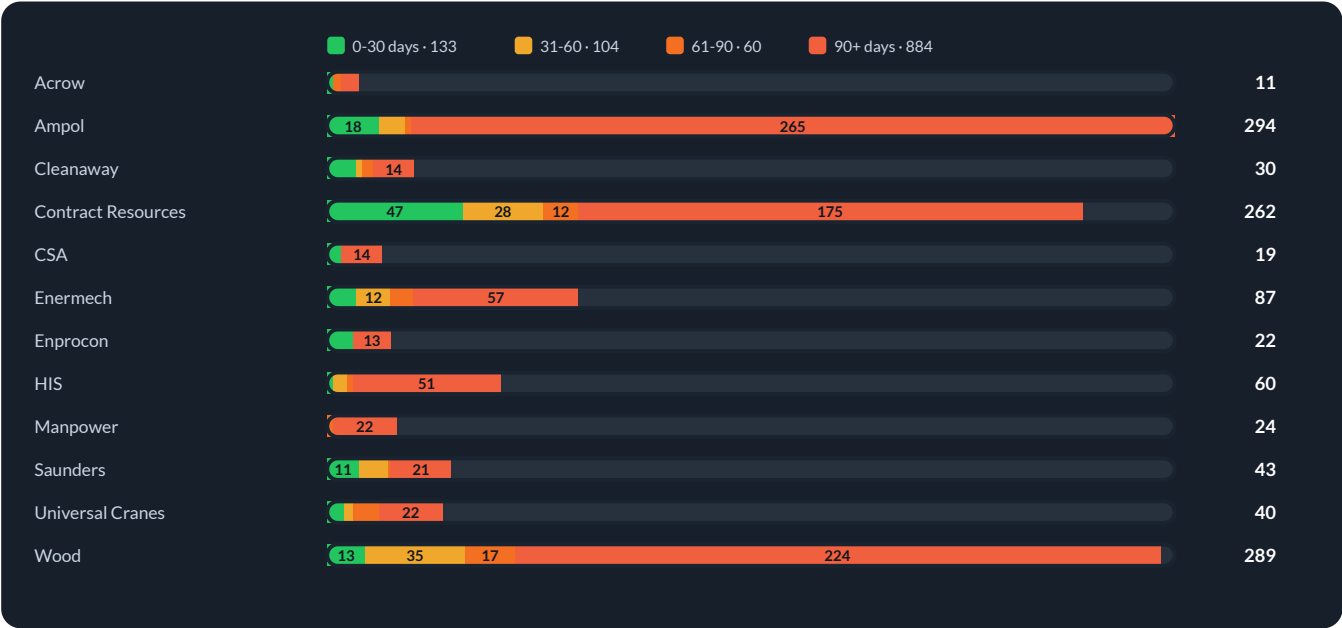

Replacement-value exposure by company - \$1,800,663 across 40 companies (ranked by value)

Ranked by value - the top 10 of 40 companies; the remaining 30 hold \$153,424 between them.

On-hire ageing by company - 1,257 radios and batteries on hire, the 12 companies holding ten or more, A to Z

**Companies with fewer than ten units:** AGM Engineering (2), ARL (4), Assured Enviromental (1), Baker Hughes (1), Brady Marine & Civil (1), Commerical Marine Group (1), CXC Corporate Services (1), De Solutions (1), Dredge Solutuions (1), Green Life Group (1), Heat Tech (1), Industrial Protective Coatings (2), Intertek (3), IPS (8), John Crane (2), Mattioli (4), NDE Solutions (9), Piping Solutions (4), Programmed (7), Provac (1), Sureline Fencing (2), Team Furmanite (6), Temp Contractor (3), Total Refractory Management (3), UGL (1), Worley Parsons (1), Wrap Resources Australia (4), Zancott Knight (1) - 76 units across 28 companies.

Days out at the pull (02 Sep 2026 18:30), in the four bands of the legend. The chart holds 1,181 units and the legend totals count those; the line under it holds the other 76, 1,257 in all. Each row adds up to that company's units on hire - its 2026 units in the register pages plus its 2023-2025 units in the value story. Out-of-service custody units are not counted here, as everywhere in this report.

Age of hire - how long the 1,257 on-hire units have been out

Everything beyond 30 days is due for a return or a rescan; 2023-2025 issues drive the over-365 band.

2023-2025 - the value story

762 radios and batteries issued in prior years remain on hire - \$1,220,930 of equipment. Rather than listing 762 lines, this section summarises by year and company (line-item detail is available from the Tool Store on request). Any unit still in use: bring it past the store for a rescan. Any unit not in use: return it.

| COMPANY (RANKED BY VALUE) | 2023 | 2024 | 2025 | UNITS | VALUE | OLDEST (DAYS) |
|---------------------------|------|------|------|-------|-------|---------------|
| Brady Marine & Civil      | 1    | -    | -    | 1     | \$246 | 1,281         |
| Assured Enviromental      | -    | -    | 1    | 1     | \$246 | 261           |
| Mattioli                  | 1    | -    | -    | 1     | \$246 | 1,000         |

Values in red carry \$100,000 or more of equipment. The fastest way off this table is a return or a rescan.

## APPENDIX

## The complete register, A to Z

---

Everything from here is the complete list: every radio and every battery issued in 2026 and still on hire, company by company from A to Z and longest-held first, then the units out of service. The story - the position, what moved, the pictures and the 2023-2025 value summary - is on the pages before this one. Prior-year line detail is available from the Tool Store on request.

495 units across 27 companies

2026 - radios on hire, full detail

187 radios issued in 2026 are on hire - \$503,965. Companies A to Z, one customer one name; inside a company, longest-held first. 30 days or more shows in red.

## Data and method

Source: the SiteIQ RENTAL\_STOCK export requested 02 Sep 2026 18:30 - every Motorola site radio and radio battery on the register, with its status, company, hirer, on-hire date and storage unit. Report built 03 Sep 2026 05:31. 2026 issues are shown in full; 2023–2025 issues are summarised by year and company. Companies are one customer one name (project accounts roll up to their parent). Replacement values: new replacement price per Ampol\_ToolStore\_Pricing.xlsx. Movement from Data\previous and TRANSACTIONS; days out count from the pull time. Trend page: appears once seven days are on record (1 today). The year in movements, return windows, the counter's rhythm, who holds what and the log-versus-register page read the SiteIQ TRANSACTIONS export (TRANSACTIONS.xlsx, sheet CUSTOMER\_CONTRACTOR\_EQUIP, report period 01 Jan 2026 06:00 to 02 Sep 2026 05:59) - 12,582 movements of this report's 1,418 barcodes. Rules: a hire closed inside 6 minutes is a short hire; 15 or more items drawn by one hirer inside one hour is a mass draw; a product is the description with its size and serial tail removed - a radio's description keeps the serial prefix SiteIQ writes into it, so the return-window table groups by this report's own radio and battery rule and its total line is the engine's own. Same-day means the return scan fell on the issue scan's date.

## How the radio fleet is run

### RETURN IT OR RESCAN IT

Not in use - back to the store, scanned in on the spot. Still in use - a thirty-second rescan at the counter is proof of existence. Either way the record updates immediately.

### REPLACEMENT VALUE, APPLIED CONSISTENTLY

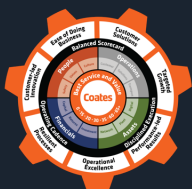

Radios \$2,695, batteries \$246 (new replacement price per Ampol\_ToolStore\_Pricing.xlsx). Units that can be neither returned nor verified are chargeable at that value under the hire arrangement - the same rule for every company.

### TWO SCANS, TWO LOOKS

Every unit is scanned and sighted going out, and scanned and sighted coming back. Radios are charge-checked on return. Life Saving Rule 5 - Tools and Equipment (SEQ-GL-009): nothing damaged, defective or flat is ever reissued.

### NUMBERS YOU CAN CHALLENGE

Every count on every page is read from the SiteIQ RENTAL\_STOCK export as at 02 Sep 2026 18:30 - never a summary tab. Fleet on the register: 637 radios and 781 batteries, including 28 SATGAS turnaround units; 14 units are held on shared site accounts, shown as such. serial numbers from the radio register or the serial SiteIQ carries in the item description - 627 of the 634 radios on hire have one, 7 show a dash. Unpriced units (0) show a dash and are never estimated.

### THE COATES WAY • OUR OPERATING MODEL, OUR STANDARD, OUR WAY

Australia's most trusted equipment partner - delivering Best Service & Value.

**PURPOSE** Supporting Australia's growth with leading equipment solutions.

**Care Deeply** (safety & wellbeing first, always) • **Customer Focused** (listen, anticipate, exceed expectations) • **Be Our Best** (accountability, learning, determination) • **One Team** (collaborative, trusted, inclusive) • **Competitive Spirit** (set stretch goals, be THE best)

**SCORECARD** Green - on track • Amber - at risk • Red - action needed: a documented root cause, corrective actions, an owner and a deadline.

**WHERE THIS REPORT SITS** Operational Excellence, Ease of Doing Business, Reduce Friction, Cadence - one scan at the counter closes the record; nothing is chased that the register already answers

Every figure in this report is counted from the SiteIQ exports named on its data page - nothing is estimated, weighted or typed in. Wording: The Coates Way, branch edition, July 2026.
