Ampol Stocktake Count Worklist

Ampol Lytton Refinery • Permanent Tool Store

Generated: 03 Sep 2026 05:32 | Data as at: 02 Sep 2026 18:29 (SiteIQ stocktake export request time) | Author: Andrew Fisher

KEY • **OLDEST FIRST** every scan resets the clock • **P1 DAILY** gas monitors, radios and batteries first • **ON HIRE** legitimately out - do not hunt shelves

TODAY'S COUNT. 332 items are due on their tier targets across the store, worth \$122,731; 1,734 items were scanned in the last 7 days and SOP compliance sits at 65.3%. Work each section oldest first - every scan resets that item's clock. Rows marked **ON HIRE** are legitimately out: do not hunt shelves for them.

TEAM - HOW TO WORK THIS LIST (PER THE DAILY STOCKTAKE SOP)

- Stock takes are completed daily, without exception**
Both shifts as one team. Work each section oldest first; every scan resets that item's clock.
- Sections 1-2 first (gas monitors, radios and batteries), every day**
Priority 1, 7-day cycle. Monitors are bumped and charged before issue. Then section 3 (Milwaukee, 14-day), then the store walk bay by bay (30-day SOP).
- Discrepancies are actioned on the spot**
Missing - escalate same day. Misplaced - relocate and correct in the system. Count mismatch - recount and report, never adjust away. Damaged - Out of Service tag, photo, report.
- ON HIRE rows are legitimately out - do not hunt shelves for them**
If you physically sight an on-hire item in the store, flag it same day and process it through the double-check return process.

Scanned last 7 days: 1,734 items (Thomas Maher x1,167 • Matt Bedford x567). Good work - keep the cadence.

HOW PRIORITY IS DETERMINED (AND WHAT COUNTS AS DONE)

PRIORITY TIER	TARGET CYCLE	WHY
Gas Monitors	Every 2 days	Safety-critical; bumped & charged before issue; sighted every 2 days
Radios & Radio Batteries	Every 2 days	Safety-critical comms; high churn; sighted every 2 days
Milwaukee Tools & Batteries	Every 2 days	High value, high shrinkage risk; sighted every 2 days
All Other Tooling	Every 30 days	30-day full-coverage SOP cycle

An item is **DONE** when it is physically scanned - the scan resets its clock. Issue and return scans count, so this worklist naturally surfaces **idle stock** (gear that hasn't moved), which is exactly what goes missing quietly. Severity against the 30-day SOP: **TARGET DUE** = outside its tier target but still inside the SOP window **SOP DUE** = 31–60 days **CRITICAL** = over 60 days or never sighted. Client compliance is measured on the 30-day SOP; the 7/14-day cycles are the Coates internal standard, set above the SOP.

0. Possible missed returns - resolve first (2)

Physically sighted in a store bay on a later day than their recorded on-hire date, yet still showing ON HIRE - likely missed return scans. Locate, confirm, and process through the double-check return process today so hirers are not held for gear that is home.

SIGHTED IN	BARCODE	DESCRIPTION	ON HIRE TO	ON-HIRE DATE	SIGHTED	UNIT PRICE
WELDING BAY	WG0047/007	Caddie Welder Kemppi	Repairs – All-Around - Repairs	10/08/2026	02/09/2026	\$1,950

5. On-hire verification - 2663 items outside 30 days (do not shelf count)

ON HIRE in the system - with contractors, not on shelves. Verified through the double-check return process and shutdown checks. Grouped by company (A-Z, one customer one name; hirers A-Z inside a company) so we know who holds what and the value of it; each line shows the home bay it returns to.

Acrow - 16 items on hire 30+ days since last sighting • \$21,465

HIRER	ITEMS (BY CATEGORY)	RETURNS TO (HOME BAY)	VALUE	OLDEST (DAYS)
Adrian - Thouvenot	Tooling & Equipment ×2, Radios & Radio Batteries ×1	AMPOL NEW TOOL STORE ×2, CHARGING STATION ×1	\$3,385	63

Data and method

Countable assets exclude 4,915 lines that have departed the store (Pending Branch Receipt, or a Departure scan with the item no longer on the live register). Prices are Avg Buy Price (New) matched on item description (corrected descriptions applied by barcode; 493 serial-numbered gas monitors priced by their family line); unpriced items show a dash and are listed on the Pricing Gaps tab of the Excel worklist - no price is estimated. SiteIQ still carries the site's former name on 3,127 of these descriptions; they are shown under the current name (Ampol). Status, hirer and home bay joined from RENTAL_STOCK by barcode. Sighting an ON HIRE item in the store is a missed return - flag and process same day.

Life Saving Rule 5 – Tools and Equipment (SEQ-GL-009): nothing damaged, defective or out of test date is ever reissued. Two scans. Two looks. One standard. Stock takes are done daily. No exceptions.
