KEY • ON HIRE issued this year and still out at the pull • A TO Z companies, then hirers, items longest-held first • DAYS calendar days out since the on-hire date

RED

502 of the 1,496 tooling items on hire (2026) have been out more than 90 days (33.6%) - above the 25% red line.

THE RULE
Share of tooling items on hire (2026) out more than 90 days: Green under 10%, Amber from 10%, Red from 25% (default line - set in CONFIG). Nine in ten completed tooling hires this year were back inside 31 days; the 90-day line is 2.9 times that.

THE POSITION. This is the register of every tooling item on hire at the SiteIQ pull of 03 Sep 2026 15:27: 1,496 items issued since 01 Jan 2026. The full register, company A to Z, is behind the appendix divider.

Every company A to Z, every hirer under it A to Z, every item with its start date and days out - so anyone can find their gear and hand back what is finished with. The quarterly charge reports carry the billing position at quarter close; this is the field position today.

WHAT "ON HIRE" MEANS IN THIS REPORT

- An item is on hire when the SiteIQ RENTAL_STOCK register showed it On Hire to a company at the pull (03 Sep 2026 15:27) with an on-hire date in 2026. Days = calendar days from that date to 03 Sep 2026.
- Tooling only: radios, gas monitors, Dräger equipment, lanyards and steel coil clamps are excluded because they have their own reports (Radio, Gas Monitor, Rigging).
- Custody accounts are not customers. The Repairs custody account (13 items) is inside the count and the tool store's own holding accounts (88 items) are outside it; both are listed in their own section at the back, marked not customer hire.
- 850 register rows on hire since before 01 Jan 2026 are excluded from the count and listed at the back by company - they are 88 Dräger gas monitors, 2 gas monitors, 760 radios, carried by their own reports.
- Every table is A to Z (companies, hirers, accounts) with items longest-held first. The one ranked table - the top 15 hirers - says so in its heading.

Where the count sits

WHERE	ITEMS	NOTE
Customer hire to named people	1,401	20 companies, 261 hirer names (262 company-hirer pairs: 1 name recorded under two companies)
Customer project / workflow account: FCCU - 2026 (SFI) (under Ampol)	82	booked to an account, not a person
Repairs custody account (internal)	13	Coates workflow, not customer hire
Total on hire	1,496	\$525,201.50 priced

The oldest hire started 05 Jan 2026 (241 days ago); 502 items have been out more than 90 days (\$221,085.80 priced). 82 items are booked to customer project / workflow accounts (FCCU - 2026 (SFI) under Ampol).

Since the last pull

Pull against pull: the SiteIQ register pulled **02 Sep 2026 18:30** against the register pulled **03 Sep 2026 15:27**, item by item, for the population of this report (tooling items on the SiteIQ register - radios, gas monitors, Dräger equipment, lanyards and steel coil clamps are excluded, and so are the tool store's holding accounts and the Company Repairs account; on-hire dates in 2026). Every row below is an item with a barcode - nothing is estimated.

The 24 hours before the pull

Between **02 Sep 2026 15:27** and **03 Sep 2026 15:27** the SiteIQ TRANSACTIONS export records **0** tooling items issued and **30** returned (tooling items on the SiteIQ register - radios, gas monitors, Dräger equipment, lanyards and steel coil clamps are excluded, and so are the tool store's holding accounts and the Company Repairs account). This part needs no earlier pull - it is counted from the day's transactions.

Showing 25 of 30 movements - company A to Z, then time; the counts above are the full figures.

Quarter close - the look forward

Of the **1,496** tooling items on hire, **225** will have been out 90 days or more by **30 Sep 2026** unless they come back - \$213,983.90 at replacement (224 priced / 1 unpriced). This is arithmetic on each item's on-hire date and nothing more: an item under 90 days out at the pull (03 Sep 2026) whose on-hire date is on or before 02 Jul 2026 crosses the line before the close. A further **512** are already over 90 days today - the band on page 1 - and are not counted again here. Across the whole register, every family and every account, 316 items will have been out 90 days or more by 30 Sep 2026 unless they come back.

Ampol	Thoeun - Nam	AMP384/052	USB Wall Charger	02 Jul 2026	63	30 Sep 2026

So what: these 225 items are the quarter-close charge in waiting - Ampol carries the most (64, from 04 Sep 2026); a supervisor's walk of this list before 30 Sep 2026 brings them home before they become a charge at replacement cost.

Return windows by product - ranked by completed hires, top 25 of 55 products

How long the items on hire today are normally out: the TRANSACTIONS log holds **3,186** completed hires this year (out and back, any hirer) for the 1,496 barcodes on page 1. Median hold **1.2 days**; nine in ten were back inside **31 days**; 39.2% came back the same day. By product - the SiteIQ description with its size and serial tail removed - for the products with ten or more completed hires; 633 hires sit in products with fewer than 10 each and are pooled into the total, not listed.

Total	3,186	1.2	31	39.2%

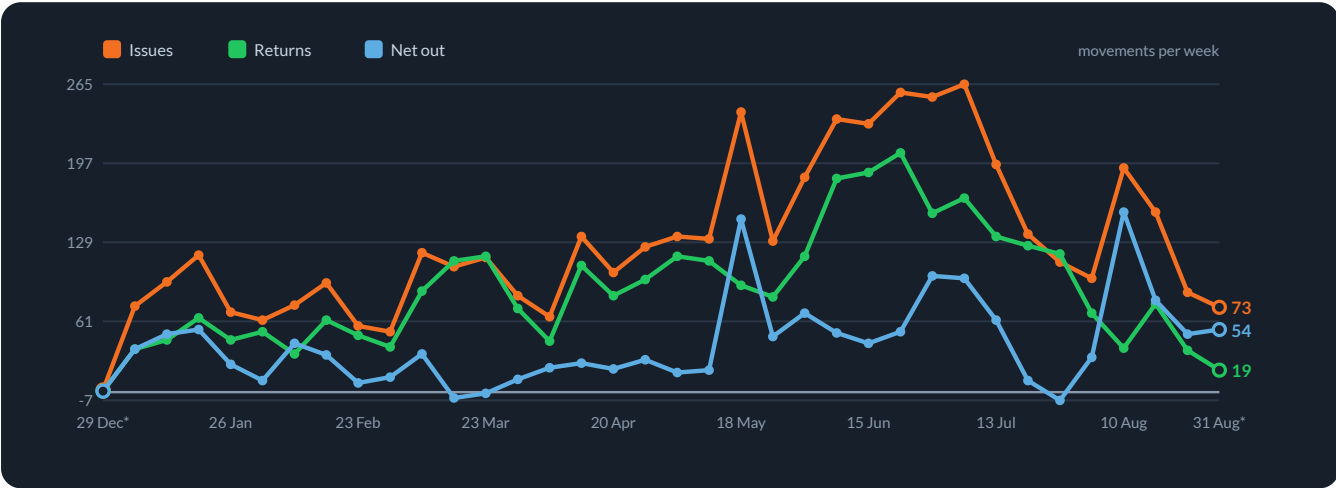

Total = every completed hire of this population this year (3,186), the pooled 633 included.

So what: nine in ten of these items come back inside 31 days, so the 90-day line is 2.9 times the normal window - an item past it is not late by a little, it is parked.

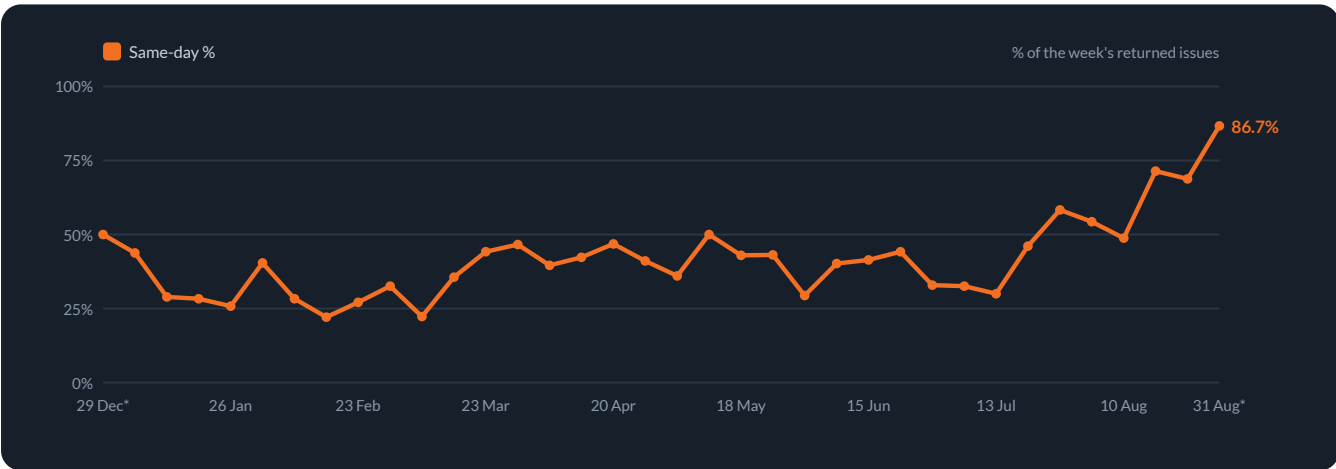

Chase the over-90 list as parked gear, not overdue gear.

The year in movements - the items on hire today

The history of the 1,496 tooling items on hire today, from the TRANSACTIONS export (01 Jan 2026 06:00 to 03 Sep 2026 05:59): every time one of them went out this year and every time one came back, by ISO week - **4,666** issues and **3,186** returns. It is these items' year, not the whole store's traffic (that picture is on the Executive Summary); the movement scoreboard's trend page, when it appears, reads this report's own printed figures instead.

The items on hire today by ISO week (week starting): issues by the start time, returns by the end time, net out = issues less returns in the week (below the zero line when returns beat issues). Busiest week 06 Jul: 265 issues. * partial weeks: 29 Dec (the log begins 01 Jan 2026); 31 Aug (runs to the pull, 03 Sep 2026 05:59).

Same-day share by week: of the week's issues that have come back, the share that came back the day they went out. Highest 31 Aug (86.7%), lowest 16 Feb (22.1%). * partial weeks: 29 Dec (the log begins 01 Jan 2026); 31 Aug (runs to the pull, 03 Sep 2026 05:59).

Total	4,666	3,186	+1,480	-

So what: the week of 06 Jul put the most of today's on-hire gear into the field (265 issues) - the weeks with the highest net out are where the over-90 tail was born, and the same-day line is the habit to hold: the higher it sits, the shorter the tail.

Items on hire by company, A to Z

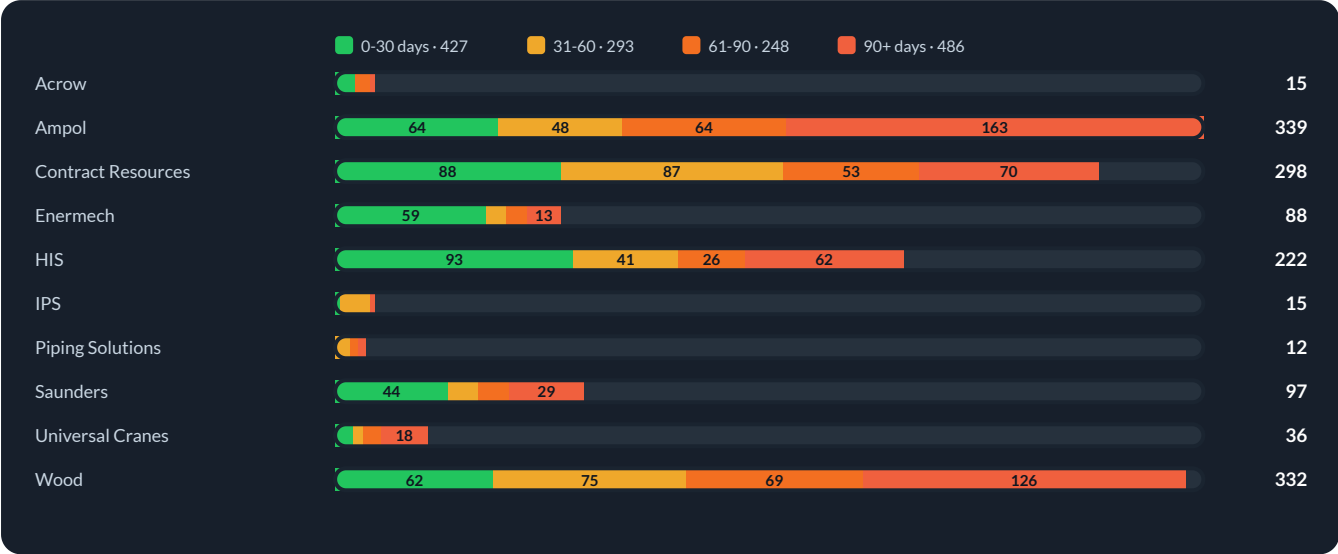

Items on hire by company with the priced replacement value beside each bar - all 20 companies, A to Z, not ranked. The Repairs custody account (13 items) is not a company and is not drawn.

Hirers counts people only; a company's project / workflow account is listed under the company in the register, not counted as a hirer.

On-hire ageing by company, A to Z

Each company's items on hire by days out at the pull (03 Sep 2026): 0-30, 31-60, 61-90 and over 90 days. 10 of the 20 companies, A to Z, not ranked - those with ten or more items; the 10 with fewer are listed under the chart. The legend totals are for the charted companies; the table carries every company and the full total. A row's total is the company's items in the chart above. The Repairs custody account is not a company and is not drawn.

Companies with fewer than ten items: ARL (5), Austrans (2), BLJ (1), Cleanaway (5), CSA (6), Enprocon (4), Intertek (1), NDE Solutions (2), Total Refractory Management (2), UGL (1).

APPENDIX

The complete register, A to Z

Everything from here is the full register: every company A to Z, every hirer under it, every item with its start date, days out and replacement value, then the custody and holding accounts and the legacy rows. The story - the position, the movement, the pictures - is on the pages before this one.

1,483 items across 20 companies, then the Repairs custody account (13 items)

The register - every company A to Z

Companies A to Z (the SitelQ account is shown under the company name where a customer has more than one); under each company the hirers A to Z, people first and then the company's project / workflow accounts; under each hirer the longest-held item first, then A to Z by description. Hirer names are as SitelQ records them. Descriptions are the corrected names where the mapping has one. Replacement is the catalogue new-buy average; a dash means no catalogue price, never \$0. Days = calendar days from the on-hire date to 03 Sep 2026.

Custody and holding accounts - not customer hire

Two kinds of internal account hold 2026 tooling. The **Repairs custody account** (13 items) is inside the 1,496 above: gear sent off site for repair, tagged and tracked, never reissued until right. The tool store's own **holding accounts** (88 items) are outside the count exactly as the workbook always treated them: the counter, the yard, the loading bay, all-around repairs and the out-of-tag park. Neither is chased with any company; both are listed here so nothing on the register is unseen.

Repairs custody account - inside the 1,496, A to Z

Radio and gas families in custody accounts (2026, not tooling)

Counted here so the custody picture is complete; these items are not tooling and are carried by their own reports.

ACCOUNT	FAMILY	ITEMS	REPORTED BY
Dräger	Dräger gas monitors	109	Gas Monitor report
Dräger	Gas monitors	131	Gas Monitor report

The Repairs account holds 71 register rows in all: 13 inside the count (off-site repair custody) and 58 in the holding accounts above.

Legacy on hire - before 01 Jan 2026, A to Z

850 register rows are still on hire from issues before 01 Jan 2026 (oldest 14 Feb 2023). They are not in the 1,496 because they are 88 Dräger gas monitors, 2 gas monitors, 760 radios; no tooling item on hire pre-dates this year. The Radio and Gas Monitor reports chase them; they are listed here by company so the recovery story is complete - 37 companies, A to Z.

Data and method

SOURCE	AS AT / SIZE	USED FOR
SiteIQ RENTAL_STOCK.xlsx	SiteIQ pull 03 Sep 2026 15:27; 8,184 register rows	every on-hire line: company, hirer, barcode, description, on-hire date, status
Tooling_Description_Mapping.xlsx	3,415 rows; 3,415 barcodes, 2,636 unambiguous descriptions	corrected descriptions: 514 lines by barcode and 855 by matching description of the 1,496
Ampol_ToolStore_Pricing.xlsx	3,227 rows; 2,396 distinct descriptions	replacement value = Avg Buy Price (New); first price wins where a description is listed more than once
SiteIQ TRANSACTIONS.xlsx (CUSTOMER_CONTRACTOR_EQUIP)	SiteIQ pull 03 Sep 2026 13:58; report period 01 Jan 2026 06:00 to 03 Sep 2026 05:59; 91,021 movements	the 24 hours before the pull, the return windows by product and the year in movements - each for this report's population (the on-hire barcodes above)
SiteIQ STOCKTAKE.xlsx	SiteIQ pull 03 Sep 2026 15:28	not used for any figure on this report (it feeds the Compliance report)

Rules applied

- On hire = a RENTAL_STOCK row with a company, a 2026 on-hire date and a tooling description; radios, gas monitors, Dräger equipment, lanyards and steel coil clamps are excluded (their own reports); the tool store's holding accounts (T&I - Tool store, All-Around - Repairs, Bulk - Yard, Loading Bay - Out Of Service, Out Of - Calibration, Rigging & 240V - Out Of Tag Date) are excluded from the count and listed in the custody section.
- One customer, one name (shared suite rule): the site's former-name account and the refinery legal name both read Ampol; CR reads Contract Resources; FCCU and SATGAS/MOL project accounts roll up to their company and the SiteIQ account is shown under the company and against the hirer.
- SiteIQ still carries the site's former name on 3,137 item descriptions (336 of the 1,496 lines in this report) and 1 customer account; shown here under the current name. Barcodes are identifiers and are never changed.
- Hirer names are as SiteIQ records them (an entry typed wholly in capitals or wholly in lower case is shown in title case). A hirer is a person; project / workflow accounts and custody accounts are counted separately and never as people.
- Replacement value = catalogue Avg Buy Price (New) from Ampol_ToolStore_Pricing.xlsx, first price wins on duplicates; 1,329 of the 1,496 lines are priced (\$525,201.50) and 167 are unpriced - a dash, never \$0, never estimated, never in a total.
- Days = calendar days from the on-hire date to 03 Sep 2026; the ageing bands are 0-30, 31-60, 61-90, 91-180 and over 180 days. Category is a keyword match on the register description (Rigging / Electrical / High Torque; General otherwise).
- Order: every table is A to Z (companies, hirers, accounts, legacy companies) with items longest-held first and then A to Z by description; the ranked tables - the top-15 hirers and the items that crossed 90 days - say so in their headings. Every figure is counted by this kit from the exports named above - the Excel workbook is not read for any printed number.
- Since the last pull: the SiteIQ register is compared item by item with the newest earlier RENTAL_STOCK export parked in Data\previous (came back, went out, changed hands, crossed 30 / 60 / 90 days while out); the 24 hours before the pull are counted from the TRANSACTIONS export's start and end times. Both use this report's population (tooling items on the SiteIQ register - radios, gas monitors, Dräger equipment, lanyards and steel coil clamps are excluded, and so are the tool store's holding accounts and the Company Repairs account). No earlier pull means no pull-against-pull rows and a plain note saying so.
- Trend page: appears once seven days are on record (2 today).
- Quarter close - the look forward: arithmetic on the RENTAL_STOCK on-hire dates of the items on hire above - an item under 90 days out at the pull whose on-hire date is 90 days or more before the quarter close crosses the line unless it comes back; a count, never a forecast. Items already over 90 days are stated beside it, not counted again. The store-wide figure in that section counts every family and account on the register the same way.
- Return windows and the year in movements: the TRANSACTIONS export's rows for this report's barcodes - a completed hire is a row with a start and an end time; the median and the 90th percentile are read off the sorted hold times in days; same-day means the end date equals the start date. A product is the SiteIQ description with its size and serial tail removed (the corrected name is shown where the mapping has one for every item under it); products with fewer than ten completed hires are pooled. Weeks are ISO weeks by start time (issues) and end time (returns); the partial weeks are marked. Every figure is a count or a sum over rows in the export.

Honest limits

- Data as at: SiteIQ RENTAL_STOCK pull 03 Sep 2026 15:27; SiteIQ TRANSACTIONS pull 03 Sep 2026 13:58 (report period 01/01/2026 06:00:00 - 03/09/2026 05:59:59); SiteIQ STOCKTAKE pull 03 Sep 2026 15:28. Every figure is computed from these exports by this kit - the Excel workbook is not read for any printed number.
- Replacement value is the catalogue new-buy average (Avg Buy Price (New) in Ampol_ToolStore_Pricing.xlsx); where a description is listed more than once the first price is used. Unpriced items show a dash and are excluded from value totals - never estimated.

Our standard, honest limits and how to read this report

OUR STANDARD

Life Saving Rule 5 - Tools and Equipment (SEQ-GL-009): nothing damaged, defective or out of test date is ever reissued. Every issue and every return runs through the double scan - Two scans. Two looks. One standard. | Nothing goes on the shelf unless it is ready for hire. | Right first time. Every item. Every time. Daily stocktakes keep eyes on the fleet: nothing in the store goes over 30 days without being scanned, and anything damaged is tagged Out of Service on the spot. We are here to help - if gear is finished with, hand it back to the tool store and it comes off your list the same day.

HONEST LIMITS

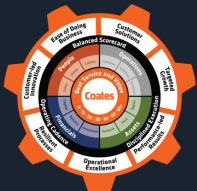

Every figure on these pages is counted by this kit from the SiteIQ exports named under Data and method - never from a workbook tab or a typed-in summary. Unpriced items show a dash and never enter a total. Where a rule or a limit matters, it is written out there in plain words.

NAMES AS SHOWN

The site is Ampol on every page: where SiteIQ still carries the former name it is shown under the current one, and the Tooling On-Hire Report's data page says how many lines do. One customer, one name: project accounts roll up to their company and the SiteIQ account is shown against the hirer. Hirer names are as SiteIQ records them.

HOW TO READ THIS

Every table is A to Z unless its heading says ranked by. Days are calendar days from the on-hire date to the pull. A dash in a value column means no catalogue price - never an estimate. Anything finished with: hand it to the counter and it is off the list the same day.

THE COATES WAY • OUR OPERATING MODEL, OUR STANDARD, OUR WAY

Australia's most trusted equipment partner - delivering Best Service & Value.

PURPOSE Supporting Australia's growth with leading equipment solutions.

Care Deeply (safety & wellbeing first, always) • **Customer Focused** (listen, anticipate, exceed expectations) • **Be Our Best** (accountability, learning, determination) • **One Team** (collaborative, trusted, inclusive) • **Competitive Spirit** (set stretch goals, be THE best)

SCORECARD Green - on track • Amber - at risk • Red - action needed: a documented root cause, corrective actions, an owner and a deadline.

WHERE THIS REPORT SITS Performance-led Results, Operational Excellence, Customer Centric, Cadence • every over-90-day item has a named holder; the quarterly recovery cycle is the cadence that keeps the fleet honest

Every figure in this report is counted from the SiteIQ exports named on its data page - nothing is estimated, weighted or typed in. Wording: The Coates Way, branch edition, July 2026.
