PAGE 1 OF 19

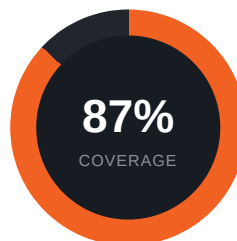

This one is yours. The client sees a scorecard that says the store is under control - here is the work that MAKES it true. **3,005 counts** have gone through the stocktake screen, 1329 of them in the last 24 hours, and right now **76% of the 3,454 countable items are inside the 3-day cycle**. Your biggest single day so far: **980 counts on 26 Jul**. The wheel doesn't turn itself - it's turned by the people on this page.

The daily three — counted every single day

Three groups are on a DAILY count, not the 3-day wheel: gas monitors, radios and radio batteries. Gas monitors keep people alive, radios keep the site talking, and batteries are what walks. Every shelf unit in these three gets eyes on it every day - gear out with a crew counts as sighted at issue. Below is today's position and **exactly what was missed**.

KEY • **ELECTRICAL / RIGGING** test & tag current · tag colour **BLUE** · stays **BLUE** through August • **LOGBOOK** daily pre-start & logbook entry • **RETURN DAILY** back to the tool store every shift

The export keeps each item's NEWEST count only - as items get re-counted, earlier days fade from this chart. Recent days are the true read; the total above counts everything currently on record.

When the wheel turns - counts by shift window (SiteIQ stamps)

- Day window 06:00-18:00 **1,511** 50%
- Night window 18:00-06:00 **1,494** 50%

Day v night — the power board

DAY SHIFT 06:00-18:00

1,511 **2,399**

570 / 467 **20:00 (508)**

GEAR OUT / GEAR BACK BUSIEST COUNT HOUR

05:00 (309)

BUSIEST COUNTER HOUR

The verdict: Day shift turns the wheel - 50% of all stocktake counts - and **Day shift owns the counter** with 70% of counter events (gear out and back). Different shifts, different strengths - the 70/30 count deal below plays to exactly that.

The counter, day v night, last 7 shift-days - every issue and every return with a time stamp on it.

Inside counting sessions the pace runs **385 counts an hour** - about one every 9 seconds. (A session = one person counting with no break longer than 5 minutes; 2,979 counts across 7.7 hours of session time.)

Where we're heading

814 items are due. At your 3-day average of 422 counts a day the backlog clears in about 2 days; ~1,152 a day after that holds the wheel through to 11 Aug.

814

Whole units, biggest first, always onto the lighter pile - swap by agreement, and if a unit's mid-count at handover, the next shift picks up where the last one left off: the wheel doesn't care whose torch it is. The Daily Run Sheet lists every due item with a tick box in walk order - print one per shift. This plan rebuilds from the freshest export every time the report runs.

The shelf and the field — right now

The live position your counting keeps honest: of 4,906 store fleet items, 528 are out working with 98 people holding gear in their own name and 4,369 sit ready on the shelf - and a deep, counted shelf is the whole promise: nobody waits for a tool at this window. (329 site infrastructure items - plant, barriers, chutes - are out on charge besides.)

4,906

STORE FLEET ITEMS

528

OUT WORKING NOW

4,369

PAGE 13 OF 19

KEY • **ELECTRICAL / RIGGING** test & tag current · tag colour **BLUE** · stays **BLUE** through August • **LOGBOOK** daily pre-start & logbook entry • **RETURN DAILY** back to the tool store every shift

The store through the door — this shut

The stocktake keeps the shelves honest - THIS is the traffic those shelves serve. **1,773 items issued**, **1,112 returned** and **197 consumable draws** (950 items) have gone over the counter, for **203 different people** across **516 store visits**. Every one of those is a crew member equipped and back on the tools.

A visit = one person at the counter in one shift window on one day - morning and night runs count twice, fair's fair. Every event carries a SiteIQ time stamp.

Day shift v night shift — the scoreboard

	 DAY SHIFT 06:00-18:00	 NIGHT SHIFT 18:00-06:00
Items issued	1,220 takes it	553
Items returned	661 takes it	451
Consumable draws	136 takes it	61
People served	153 takes it	90
Store visits	352 takes it	164
Gear value issued (replacement \$)	\$364,051 takes it	\$243,465

Day shift takes the round, 6-0. Night crew - 1,065 counter events to 2,017 is the cruiser run. Enjoy it while it lasts. Either way: one store, one team - the scoreboard's for bragging rights, the gear's for the job.

Gear value = master-file replacement cost of items issued in each window; 415 issued item(s) carry no master price yet and are left out of the dollars, never guessed.

When the counter runs hot — and when it sleeps

Every stamped counter event this shut - issues, returns and consumable draws, by hour of day

The rush: 17:00 · 378 events 06:00 · 360 events 18:00 · 316 events

The lull: 00:00 to 04:00 barely moves - that's the window for restocks, counts and getting ahead of the next rush. The quiet hours are working hours too, just quieter ones.

Safety never knocks off

The store's Life Saving Rule - Tools and Equipment: "I will only use tools and equipment that are fit for purpose and for which I am trained, competent and authorised. I will ensure that damaged or defective equipment is tagged out and removed from service." That rule lives at this counter: damaged gear? Over the counter, tagged out, no questions - that's the system working, not a telling-off.

The high-care kit keeps its own rules: **0 gas monitor movements** through the counter this shut - every monitor on the daily bump-test rule before it works - and **336 radio movements**, serial-tracked in the holder's name. And Fit for Work stands every shift: right PPE, fit to be on the tools, day window or night.

Meet the tool store team

The crew running your K2 tool store - getting the right gear to the right crew, keeping it looked after and ready, and making sure everything that leaves the store is right. Day and night, so the shutdown keeps moving. Something not on hand or not right? Tell us and we'll sort it.

✓ The right gear to the right crew

✓ Looked after, maintained & ready

✓ Checked and right - every time

Honest limits: Counts are sightings logged with the Stocktake action in the SiteIQ STOCKTAKE export. The export keeps each item's LATEST sighting only, so day-by-day figures read 'items whose newest count landed that day' - a fair floor on the real effort, never an inflation. ALL shift credit follows SiteIQ's own time stamps against Andrew's windows - work stamped 06:00-18:00 is day-shift work whoever did it, 18:00-06:00 is night's, and a night shift belongs to the day it STARTS. The roster on the team page is who people are, never how work is credited. Session pace counts runs of 3+ counts with gaps under 5 minutes. Store traffic comes from the TRANSACTIONS export (duplicates dropped, the site idle pool excluded) plus consumable draws from SALES_STOCK; shift splits use SiteIQ's own time stamps against Andrew's windows - day 06:00-18:00, night 18:00-06:00 - and events without a stamp are counted in totals but never guessed into a shift. The live shelf-and-field position reads RENTAL_STOCK (fleet + status, site infrastructure split out) and ON_HIRE (current holders by name) - the pack stands on all five SiteIQ exports.

All returns go through the Coates tool store, handed to the stores team and double-scanned. Nothing is returned unless it is scanned.

Care Deeply · Customer Focused · Be Our Best · One Team · Competitive Spirit
