THIS IS THE SEPARATE INVOICE - THE SECOND STREAM, NOT SITEIQ. Nothing on this page appears on a SiteIQ invoice, and no SiteIQ number appears here. Transport on this page belongs to this invoice only - the SiteIQ stream carries its own. The separate invoice bills by calendar month (July bills to and including 31 Jul; August opens its own invoice), so every line below is split by month, ready to check each invoice when it lands. Start dates and rates are trusted from the pull; expected end dates change all the time and are treated as the current plan, never as truth.

"Projected" assumes live gear runs to its current expected term date (or month end). The end dates move - so will this number, and that is the point: run me the morning an invoice lands and compare.

5 line(s) past their expected end date - Refrigerator - Large (ended 23 Jul); Refrigerator - Large (ended 23 Jul); 700l chest freezer (ended 23 Jul); Table Folding 1800x900mm (ended 24 Jul); Chairs Stacking (ended 24 Jul). Either it came back (good - the next pull should drop it) or the end date needs pushing out in the hire system. Worth a look before the invoice lands.

Minimum-term top-up riding on the crib gear: \$228.80 beyond actual days - a term of the hire, not an error.

Site side reads the SiteIQ RENTAL_STOCK register - and for welders and forklifts it counts **only the sub-hired units** (dashed item numbers / SUB barcodes). Coates machines with plain numeric IDs are SiteIQ-charged and belong to the other stream, so they never muddy this check. A mismatch is a conversation, not an accusation - but if the site holds MORE sub units than this invoice bills, something is out for free: check the pull before the invoice lands.

Meet the tool store team

The crew running your K2 tool store - getting the right gear to the right crew, keeping it looked after and ready, and making sure everything that leaves the store is right. Day and night, so the shutdown keeps moving. Something not on hand or not right? Tell us and we'll sort it.

Honest limits: Read from the Baseplan pull (BASEPLAN_CHARGES.xlsx, saved 28 Jul 2026 12:43). Start dates and Rate 1 trusted as supplied; the Prebill column is ignored by instruction; expected end dates move and are shown as the current plan. Day counts are inclusive of both ends - the 70 radios at \$12.81 reproduce Baseplan's own line total to the cent. Minimum-day terms are honoured and attributed to the line's first invoice month. This page never feeds a SiteIQ number and no SiteIQ charge appears here.

All returns go through the Coates tool store, handed to the stores team and double-scanned. Nothing is returned unless it is scanned.
