PROGRESS INVOICE

SiteIQ renders the July 2026 invoice as a **single line**. This breakdown is the companion that shows what that line is made of — every dollar grouped by stream, straight from SiteIQ's own daily invoicing, covering **16 Jul - 29 Jul 2026** (14 invoiced day(s)). A **final invoice** follows next month as the shutdown closes out.

What the invoice is made of

Each stream as SiteIQ invoiced it — the rows sum to the invoice total to the cent.

STREAM	AMOUNT		SHARE
Plant, tooling & equipment hire	\$96,509		44%
Personnel / labour — progress claims	\$58,520		27%
Service claims — accommodation & consumables	\$19,637		9%
Transport	\$46,134		21%
Invoice total	\$220,801		

The month-end rule: SiteIQ registers the **last day of a month** into the next month's invoice — 31 Jul's hire sits in next month's final invoice. Radios, gas monitors and the welders are invoiced separately and are **not in this figure** — the two invoices never share a dollar.

Labour and accommodation are invoiced in lump progress claims covering a stretch of days at a time; consumable claims are one-off supply items. Neither is ever double counted against the daily hire.
