

Ampol Calibration Register

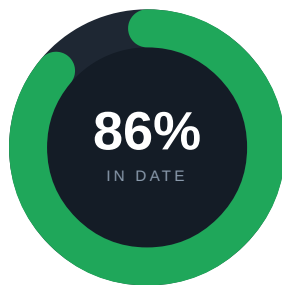

Ampol Lytton Refinery · Permanent Tool Store

Generated: 02 Sep 2026 11:11 | Data as at: 14 Aug 2026 08:08 (register Last Refresh · file saved 02 Sep 2026 09:23) | Author: Andrew Fisher

KEY • **IN DATE OR IN STORE** out-of-date gear never goes out the counter • **DUE 30 DAYS** booked for calibration before it lapses • **NO DATE** awaiting certificate details - not a failure

PAGE 1 OF 7

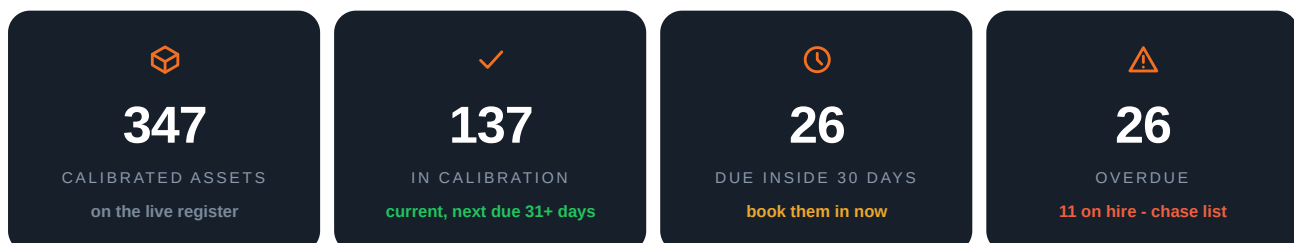

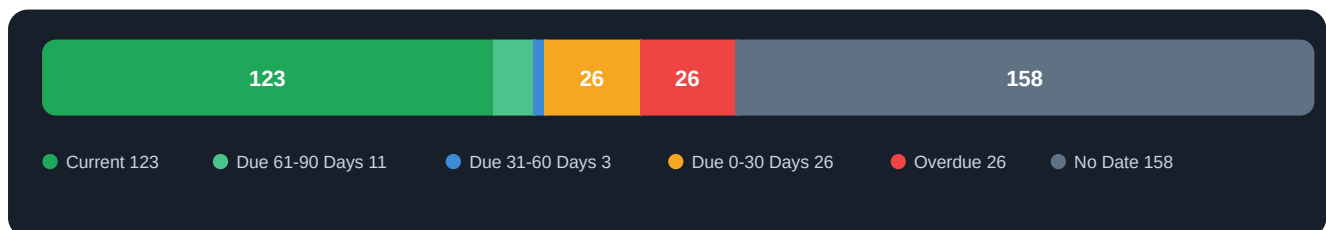

THE POSITION. One page, one honest answer: is the Ampol calibrated fleet in date and in hand? **347** calibrated assets on the live register. **137 in calibration**, **26 due inside 30 days**, **26 overdue** and **158 with no certificate date yet**. The root causes are plain: the overdue tail is led by **torque wrench and pressure gauge** (25 of the 26), 11 of them out on hire with named hirers - the chase list on page 3. No Date is paperwork catching up, not gear failing - page 5 says it straight.

Dated assets inside their calibration due date

- ✓ Dated fleet in date **86/100**
163 of 189 assets holding a due date are inside it - the register's own status arithmetic
- ✓ Register certified **54/100**
189 of 347 assets carry a calibration due date - the other 158 are awaiting certificate details

Status mix — every asset on the register, the register's own words

Data as at **14 Aug 2026 08:08** - the register's own Last Refresh timestamp - and the workbook file was saved **02 Sep 2026 09:23**; both are printed because they are not the same moment. Status and days remaining are the register's own arithmetic at that refresh, used verbatim. The register also carries 108 blank template rows (a status formula, no asset) - excluded from every count on this report.

Due inside 30 days - book these in now

26 assets fall due inside 30 days of the register's last refresh, soonest first. Booked in before the date lapses, these never touch the overdue list - that is the whole game. An asset out on hire gets its swap organised at the counter on next touch; the hirer column says exactly who to talk to.

ASSET	DESCRIPTION	CALIBRATION DUE	DAYS LEFT	ON HIRE	WHO HAS IT
WG0478/001	Pressure Gauge Analog 1,600 kPa	14 Aug 2026	0d	No	—
WG0117/001	Pressure Gauge Analog 1,600 kPa	14 Aug 2026	0d	No	—

KEY • **IN DATE OR IN STORE** out-of-date gear never goes out the counter • **DUE 30 DAYS** booked for calibration before it lapses • **NO DATE** awaiting certificate details - not a failure

Overdue and on hire - the chase list, by name

11 overdue assets are out on hire right now - these are the ones that cannot be fixed from inside the store, so they get names, not categories. Person first, worst first: a swap or recall on each is the conversation, and every one resolved moves the overdue tile down the same day.

WHO HAS IT	ASSET	DESCRIPTION	WAS DUE	OVERDUE BY
Romany - Prak 1 overdue item	C0897-38	Pressure Gauge Analog 6,000 kPa	01 Jan 2025	590d over
FCCU - 2026 (SFI) 2 overdue items	WG0020/001	Torque Wrench 1/2" Drive 200 Nm	16 Jul 2025	394d over
	H033001-34	Torque Wrench 1/2" Drive 300 Nm	25 Jul 2026	20d over
All-Around - Repairs 6 overdue items	C0808-14	Pressure Gauge Analog 1,000 kPa	02 Dec 2025	255d over
	CTX173/001	Pressure Gauge Analog 10,000 kPa	25 May 2026	81d over
	SD0033-3	Torque Wrench 3/4" Drive 1,000 Nm	24 Jul 2026	21d over
	H033001-21	Torque Wrench 1/2" Drive 300 Nm	25 Jul 2026	20d over
	05310467-3	Torque Wrench 1" Drive 800 Nm	28 Jul 2026	17d over
	WG0019/001	Torque Wrench 3/8" Drive 100 Nm	28 Jul 2026	17d over
Wayne - Toovey 1 overdue item	CTX006/009	Pressure Gauge Digital 10,000 psi (68,000 kPa)	29 Jul 2026	16d over
David - Wood 1 overdue item	SD0033-1	Torque Wrench 3/4" Drive 1,000 Nm	30 Jul 2026	15d over

Hirers ranked by their most-overdue item; days are the register's own count at last refresh. Every one of these is a counter conversation on next touch - swap organised, certificate sorted, no drama.

Ampol Calibration Register

KEY • **IN DATE OR IN STORE** out-of-date gear never goes out the counter • **DUE 30 DAYS** booked for calibration before it lapses • **NO DATE** awaiting certificate details - not a failure

Overdue in store - swap at the shelf

15 overdue assets are in the store (not on hire, or not matched to a hirer). These never leave the counter out of date - Life Saving Rule 5 - so the fix is a calibration run, not a chase: batch them to the calibrator, and each one comes back onto the dated fleet on page 1.

ASSET	DESCRIPTION	STORAGE UNIT	WAS DUE	OVERDUE BY
WG0025/001	Torque Wrench 1" Drive 1,500 Nm	G-B03	09 Dec 2025	248d over
WG0024/001	Torque Wrench 3/4" Drive 1,000 Nm	G-B03	24 Jul 2026	21d over
CTX173/003	Pressure Gauge Analog 10,000 kPa	G-B01	25 Jul 2026	20d over
WG0480/002	Pressure Gauge Analog 10,000 kPa	G-B01	25 Jul 2026	20d over
C0817-50	Pressure Gauge Analog 10,000 kPa	—	25 Jul 2026	20d over
SD0033-10	Torque Wrench 3/4" Drive 1,000 Nm	G-B03	25 Jul 2026	20d over
SD0033-7	Torque Wrench 3/4" Drive 1,000 Nm	—	25 Jul 2026	20d over
AMP019/002	Torque Wrench 3/4" Drive 300 Nm	G-B02	25 Jul 2026	20d over
AMP019/003	Torque Wrench 3/4" Drive 300 Nm	G-B02	25 Jul 2026	20d over
AMP019/004	Torque Wrench 3/4" Drive 300 Nm	G-B02	25 Jul 2026	20d over
H0368002	Torque Wrench 3/4" Drive 680 Nm	G-B02	25 Jul 2026	20d over
H3550-1	Torque Wrench 3/4" Drive 550 Nm	—	28 Jul 2026	17d over
H0368001	Torque Wrench 3/4" Drive 680 Nm	G-B02	28 Jul 2026	17d over
AMP287/002	Ampol Rad Gun 3/4"D	L-B10	30 Jul 2026	15d over
CTX006/010	Pressure Gauge Digital 10,000 psi (68,000 kPa)	G-B01	09 Aug 2026	5d over

A dash in the storage unit column means the register holds no bay for that asset - nothing here is estimated.

Ampol Calibration Register

KEY • **IN DATE OR IN STORE** out-of-date gear never goes out the counter • **DUE 30 DAYS** booked for calibration before it lapses • **NO DATE** awaiting certificate details - not a failure

No Date - awaiting certificate details, not failures

158 assets sit on the register with no calibration date recorded. Say it straight: these are **not failed or out-of-test items** - they are register lines whose certificate details are still being gathered and entered; the families below show where that paperwork lives. 1 of them already carries a serial number. Each certificate entered moves an asset from this page onto the dated fleet on page 1 - that is the fill-in work under way.

Where they sit — No Date assets by storage unit, top 10 of 24

What they are — by item family, top 7 of 40

ITEM FAMILY (FIRST WORDS OF DESCRIPTION)	ASSETS
High Pressure	25
Hydraulic Ram	17
Hydraulic Flange	12
Test Bucket	12
Hytorc Hydraulic	11
Pressure Gauge	11
Hydraulic Porta	8

Register health - the On Hire Audit

The register audits itself: every refresh it sweeps the whole on-hire fleet and writes an exception row for anything it cannot reconcile - **3,478 exception rows** this refresh, across **732 hirers**. This is the health check that stops the register quietly drifting away from reality.

Exceptions by reason — showing 1 of 1 reason, what each means in plain words

REASON (AS THE REGISTER WRITES IT)	ROWS
On hire in RENTAL_STOCK but not listed in Register Entry The item is out on hire in the rental system but has no line in the register's entry sheet. Most of this is general tooling with no calibration requirement - the audit sweeps EVERYTHING on hire so nothing that does need a certificate can slip out unregistered.	3,478

Where the exceptions sit — top 10 of 732 hirers by exception rows

Thoeun - Nam	197
Dräger - FCCU	179
Future - Fuels	87
Bart - Edwards	65
Dräger - Dräger – Out of Calibrati	52
All-Around - Repairs	51
FCCU - 2026 (SFI)	51
Glenn - Mccabe	48
Dane - Cassidy-Shutdown	45
Simon - Phillips	40

An exception row is not a lost item and not a compliance breach - it is the register saying "I can see this on hire and I have no calibration line for it". The bulk is general tooling that needs no certificate; the audit exists so the fraction that does can never slip through unregistered.

KEY • **IN DATE OR IN STORE** out-of-date gear never goes out the counter • **DUE 30 DAYS** booked for calibration before it lapses • **NO DATE** awaiting certificate details - not a failure

How the calibrated fleet is run

IN DATE OR IT STAYS IN

Nothing goes out the counter with a lapsed certificate. An overdue asset in store is a calibration run, not a risk - Life Saving Rule 5, Tools and Equipment (SEQ-GL-009).

THE REGISTER REFRESHES ITSELF

Live off SharePoint - the moment a certificate is entered or gear moves, the next refresh carries it. This report prints the refresh timestamp it was built from, every page.

NAMES, NOT CATEGORIES

An overdue asset on hire is chased by hirer name at the counter - a swap organised on next touch beats a lecture every time.

HONEST ABOUT THE GAPS

No Date means the certificate details are still being entered - said plainly, counted separately, never blended into a compliance score. Blanks print as dashes, **never guesses**.

Meet the tool store team

The crew running your Ampol store - keeping the register true, the certificates current and the gear ready. Something not right? Tell us and we'll sort it.
