KEY • ON HIRE issued this year and still out at the pull • A TO Z companies, then hirers, items longest-held first • DAYS calendar days out since the on-hire date

**THE POSITION.** At the SiteIQ pull on 02 Sep 2026 18:30, **1,500** tooling items issued since 01 Jan 2026 were on hire: 1,405 to named people across 20 companies, 82 to customer project / workflow accounts (FCCU - 2026 (SFI) under Ampol) and 13 in the Repairs custody account. The replacement value of the 1,333 priced items is **\$525,700.50**; 167 items have no catalogue price and sit outside that figure - never estimated, never \$0. The oldest hire started 05 Jan 2026 (240 days ago); 507 items have been out more than 90 days (\$224,747.80 priced). This report is the register: every company A to Z, every hirer under it A to Z, every item with its start date and days out - so anyone can find their gear and hand back what is finished with. The quarterly charge reports carry the billing position at quarter close; this is the field position today.

Over-90-day list to each company's supervisor at the quarter-close run; returns or rescans reported on the next report - by **09 Sep 2026**.

WHAT "ON HIRE" MEANS IN THIS REPORT

- An item is on hire when the SiteIQ RENTAL\_STOCK register showed it On Hire to a company at the pull (02 Sep 2026 18:30) with an on-hire date in 2026. Days = calendar days from that date to 02 Sep 2026.
- Tooling only: radios, gas monitors, Dräger equipment, lanyards and steel coil clamps are excluded because they have their own reports (Radio, Gas Monitor, Rigging).
- Custody accounts are not customers. The Repairs custody account (13 items) is inside the count and the tool store's own holding accounts (87 items) are outside it; both are listed in their own section at the back, marked not customer hire.
- 853 register rows on hire since before 01 Jan 2026 are excluded from the count and listed at the back by company - they are 88 Dräger gas monitors, 2 gas monitors, 763 radios, carried by their own reports.
- Every table is A to Z (companies, hirers, accounts) with items longest-held first. The one ranked table - the top 15 hirers - says so in its heading.

### Since The Last Pull

No earlier register pull is saved in Data\previous yet - movement pull against pull starts with the next pull (button 28 parks the old export automatically).

### The 24 Hours Before The Pull

Between **01 Sep 2026 18:30** and **02 Sep 2026 18:30** the SiteIQ TRANSACTIONS export records **0** tooling items issued and **11** returned (tooling items on the SiteIQ register - radios, gas monitors, Dräger equipment, lanyards and steel coil clamps are excluded, and so are the tool store's holding accounts and the Company Repairs account). This part needs no earlier pull - it is counted from the day's transactions.

## APPENDIX

# The complete register, A to Z

---

Everything from here is the full register: every company A to Z, every hirer under it, every item with its start date, days out and replacement value, then the custody and holding accounts and the legacy rows. The story - the position, the movement, the pictures - is on the pages before this one.

1,487 items across 20 companies, then the Repairs custody account (13 items)

The Register - Every Company A To Z

Companies A to Z (the SiteIQ account is shown under the company name where a customer has more than one); under each company the hirers A to Z, people first and then the company's project / workflow accounts; under each hirer the longest-held item first, then A to Z by description. Hirer names are as SiteIQ records them. Descriptions are the corrected names where the mapping has one. Replacement is the catalogue new-buy average; a dash means no catalogue price, never \$0. Days = calendar days from the on-hire date to 02 Sep 2026.

Custody And Holding Accounts - Not Customer Hire

Two kinds of internal account hold 2026 tooling. The **Repairs custody account** (13 items) is inside the 1,500 above: gear sent off site for repair, tagged and tracked, never reissued until right. The tool store's own **holding accounts** (87 items) are outside the count exactly as the workbook always treated them: the counter, the yard, the loading bay, all-around repairs and the out-of-tag park. Neither is chased with any company; both are listed here so nothing on the register is unseen.

Radio / Gas Families In Custody Accounts (2026, not tooling)

Counted here so the custody picture is complete; these items are not tooling and are carried by their own reports.

| ACCOUNT | FAMILY              | ITEMS | REPORTED BY        |
|---------|---------------------|-------|--------------------|
| Dräger  | Dräger gas monitors | 142   | Gas Monitor report |
| Dräger  | Gas monitors        | 143   | Gas Monitor report |

The Repairs account holds 70 register rows in all: 13 inside the count (off-site repair custody) and 57 in the holding accounts above.

## Legacy On Hire - Before 01 Jan 2026 (A to Z)

853 register rows are still on hire from issues before 01 Jan 2026 (oldest 14 Feb 2023). They are not in the 1,500 because they are 88 Dräger gas monitors, 2 gas monitors, 763 radios; no tooling item on hire pre-dates this year. The Radio and Gas Monitor reports chase them; they are listed here by company so the recovery story is complete - 37 companies, A to Z.

Rules Applied

- On hire = a RENTAL\_STOCK row with a company, a 2026 on-hire date and a tooling description; radios, gas monitors, Dräger equipment, lanyards and steel coil clamps are excluded (their own reports); the tool store's holding accounts (T&I - Tool store, All-Around - Repairs, Bulk - Yard, Loading Bay - Out Of Service, Out Of - Calibration, Rigging & 240V - Out Of Tag Date) are excluded from the count and listed in the custody section.
- One customer, one name (shared suite rule): the site's former-name account and the refinery legal name both read Ampol; CR reads Contract Resources; FCCU and SATGAS/MOL project accounts roll up to their company and the SiteIQ account is shown under the company and against the hirer.
- SiteIQ still carries the site's former name on 3,136 item descriptions (342 of the 1,500 lines in this report) and 1 customer account; shown here under the current name. Barcodes are identifiers and are never changed.
- Hirer names are as SiteIQ records them (an entry typed wholly in capitals or wholly in lower case is shown in title case). A hirer is a person; project / workflow accounts and custody accounts are counted separately and never as people.
- Replacement value = catalogue Avg Buy Price (New) from Ampol\_ToolStore\_Pricing.xlsx, first price wins on duplicates; 1,333 of the 1,500 lines are priced (\$525,700.50) and 167 are unpriced - a dash, never \$0, never estimated, never in a total.
- Days = calendar days from the on-hire date to 02 Sep 2026; the ageing bands are 0-30, 31-60, 61-90, 91-180 and over 180 days. Category is a keyword match on the register description (Rigging / Electrical / High Torque; General otherwise).
- Order: every table is A to Z (companies, hirers, accounts, legacy companies) with items longest-held first and then A to Z by description; the ranked tables - the top-15 hirers and the items that crossed 90 days - say so in their headings. Every figure is counted by this kit from the exports named above - the Excel workbook is not read for any printed number.
- Since the last pull: the SiteIQ register is compared item by item with the newest earlier RENTAL\_STOCK export parked in Data\previous (came back, went out, changed hands, crossed 30 / 60 / 90 days while out); the 24 hours before the pull are counted from the TRANSACTIONS export's start and end times. Both use this report's population (tooling items on the SiteIQ register - radios, gas monitors, Dräger equipment, lanyards and steel coil clamps are excluded, and so are the tool store's holding accounts and the Company Repairs account). No earlier pull means no pull-against-pull rows and a plain note saying so.
- Trend page: appears once seven days are on record (1 today).

Honest limits

- Data as at: SiteIQ RENTAL\_STOCK pull 02 Sep 2026 18:30; SiteIQ TRANSACTIONS pull 02 Sep 2026 18:30 (report period 01/01/2026 06:00:00 - 02/09/2026 05:59:59); SiteIQ STOCKTAKE pull 02 Sep 2026 18:29. Every figure is computed from these exports by this kit - the Excel workbook is not read for any printed number.
- Replacement value is the catalogue new-buy average (Avg Buy Price (New) in Ampol\_ToolStore\_Pricing.xlsx); where a description is listed more than once the first price is used. Unpriced items show a dash and are excluded from value totals - never estimated.

Our standard, honest limits and how to read this report

OUR STANDARD

Life Saving Rule 5 - Tools and Equipment (SEQ-GL-009): nothing damaged, defective or out of test date is ever reissued. Every issue and every return runs through the double scan — Two scans. Two looks. One standard. | Nothing goes on the shelf unless it is ready for hire. | Right first time. Every item. Every time. Daily stocktakes keep eyes on the fleet: nothing in the store goes over 30 days without being scanned, and anything damaged is tagged Out of Service on the spot. We are here to help — if gear is finished with, hand it back to the tool store and it comes off your list the same day.

HONEST LIMITS

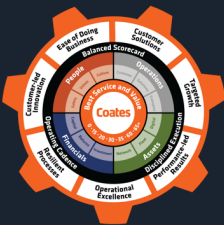

Every figure on these pages is counted by this kit from the SiteIQ exports named under Data and method - never from a workbook tab or a typed-in summary. Unpriced items show a dash and never enter a total. Where a rule or a limit matters, it is written out there in plain words.

NAMES AS SHOWN

The site is Ampol on every page: where SiteIQ still carries the former name it is shown under the current one, and the Tooling On-Hire Report's data page says how many lines do. One customer, one name: project accounts roll up to their company and the SiteIQ account is shown against the hirer. Hirer names are as SiteIQ records them.

HOW TO READ THIS

Every table is A to Z unless its heading says ranked by. Days are calendar days from the on-hire date to the pull. A dash in a value column means no catalogue price - never an estimate. Anything finished with: hand it to the counter and it is off the list the same day.
