On hire, not in the register - computed from the SiteIQ pull	12
Looks like calibration-type gear, on hire and not in the register	13

The diagram is a circular Balanced Scorecard for Coates. At the center is the Coates logo. Surrounding it are four quadrants, each with a color and a focus area:

- Top (Grey):** Balanced Scorecard, People, Customer Service and Value, Questions
- Right (Green):** Assets, Development & Innovation, Performance and Results, Growth
- Bottom (Blue):** Operational Excellence, Financial, Processes
- Left (Orange):** Customer-led Innovation, Ease of Doing Business, Customer Solutions

Each quadrant contains a circular gauge with a needle pointing to a value. The gauges are labeled with the following values:

- Top (Grey):** 100, 90, 80, 70, 60, 50, 40, 30, 20, 10, 0
- Right (Green):** 100, 90, 80, 70, 60, 50, 40, 30, 20, 10, 0
- Bottom (Blue):** 100, 90, 80, 70, 60, 50, 40, 30, 20, 10, 0
- Left (Orange):** 100, 90, 80, 70, 60, 50, 40, 30, 20, 10, 0

Ampol Calibration Register

Ampol Lytton Refinery · Permanent Tool Store

Generated: **03 Sep 2026 04:46** | Data as at: **02 Sep 2026 18:30** (SiteIQ RENTAL_STOCK request time · due dates last maintained 14 Aug 2026, 19 days earlier) | Author: **Andrew Fisher**

KEY • **IN DATE** certificate current at the SiteIQ pull time • **DUE 30 DAYS** book in before it lapses • **NO DATE** calibration status unknown until the certificate is entered

DUE DATES ARE 19 DAYS OLD - CHECK THE PAPERWORK BEFORE SENDING

Due dates last maintained **14 Aug 2026** (the register workbook's last save), **19 days** before the SiteIQ pull this report is built on. A certificate issued since then is not on the register yet - 22 assets fell due in that window (page 5). New certificates go in the **Register Entry** tab; save and run again.

RED

8 of the 48 overdue assets are out on hire at the pull - a lapsed certificate in a customer's hands until each one is swapped or recalled.

THE RULE

Red when 1 or more overdue assets are out on hire; Amber when overdue assets are off hire only (shelf, repairs or not in SiteIQ); Green when nothing is overdue. **Default line - set in CONFIG.**

OWNER

Andrew Fisher, Shutdown Manager

NEXT ACTION AND BY WHEN

Chase list to each hirer on next touch; calibration run for the 35 shelf items booked - **by 09 Sep 2026**. Certificates issued since 14 Aug 2026 entered in Register Entry.

AT 02 SEP 2026 18:30 - COMPUTED FROM CALIBRATION DUE AND THE SITEIQ PULL

THREE THINGS TO DO TODAY

1

Swap or recall 8 overdue assets out on hire

a lapsed certificate in a customer's hands - FCCU - 2026 (SFI) holds the most (2)

OWNER / BY

Andrew Fisher · by 09 Sep 2026

2

Book the 6 assets due inside 30 days

nearest due date 04 Sep 2026 - H033001-26 Torque Wrench 1/2" Drive 300 Nm

OWNER / BY

Andrew Fisher · by 09 Sep 2026

3

Book the calibration run for the 35 overdue shelf items

on the shelf in SiteIQ, not a chase - G-B01 21, G-B03 6

OWNER / BY

Andrew Fisher · by 09 Sep 2026

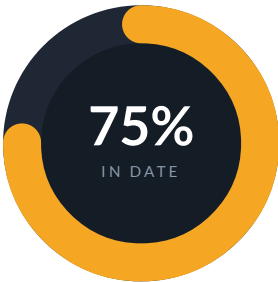

THE STORY. 347 assets on the register at the pull: **135** in calibration, **6** due inside 30 days, **48** overdue (8 out on hire) and **158** with no certificate date. 22 fell due since the due dates were last maintained on 14 Aug 2026.

Ampol Calibration Register

AS AT 02 SEP 2026 18:30

The scorecard - the arithmetic behind the position

THE POSITION, IN FULL. As at 02 Sep 2026 18:30 - the SiteIQ pull - the register holds 347 assets on the calibration register: **135 in calibration**, **6 due inside 30 days**, **48 overdue** and **158 with no certificate date**. The overdue tail is **pressure gauge and torque wrench** (46 of the 48); **8** are out on hire right now (the chase list, page 7) and 22 fell due after the due dates were last maintained on 14 Aug 2026 (page 5). No Date means status unknown until the certificate is entered - page 11.

- ✓ Dated fleet in date 75/100
141 of 189 assets holding a due date are inside it at 02 Sep 2026 18:30 - computed from Calibration Due
- ✓ Register certified 54/100
189 of 347 assets carry a calibration due date - the other 158 have no certificate entered yet

Dated assets inside their due date at 02 Sep 2026

WHERE THE OVERDUE AND NO DATE GEAR IS - SITEIQ RENTAL_STOCK

Data as at 02 Sep 2026 18:30 - RENTAL_STOCK.xlsx, SiteIQ request time (8,173 lines, 3,438 on hire). Register: Ampol_Calibration_Register.xlsx, 'Register Entry' sheet - the human-maintained list; due dates last maintained 14 Aug 2026 08:09 (from the file's own properties). Status at the pull time is computed from Calibration Due; location, hirer and hire start are SiteIQ's. Nothing here needs the workbook refreshed.

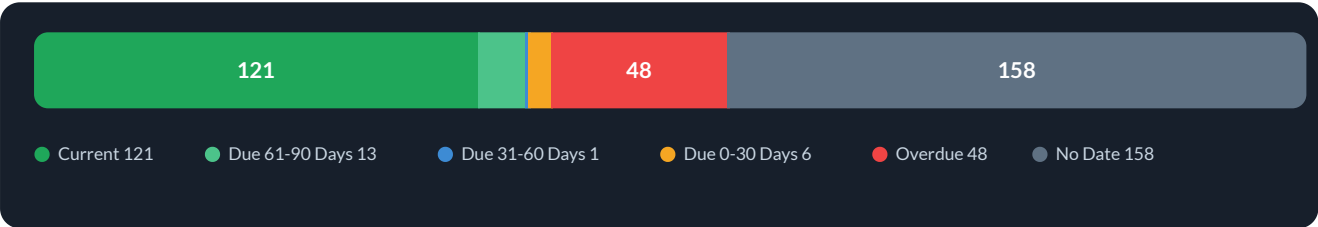

Ampol Calibration Register

AS AT 02 SEP 2026 18:30

Status mix at 02 Sep 2026 - and the register's own view, for comparison

Every figure on this report is computed from the register's due dates and the SiteIQ pull of 02 Sep 2026 18:30 - nothing needs the workbook refreshed. The register also carries its own status columns, last refreshed **14 Aug 2026 08:08**; they are printed here, labelled, so the two can be read side by side. Between the two dates nothing in the register changed; the calendar did: 22 of the register's 26 "due 0-30 days" have since fallen due, 6 of them printed as 0 days remaining on 14 Aug 2026.

Status mix at 02 Sep 2026 - computed from Calibration Due, every asset on the register

Computed at 02 Sep 2026 against the register's own view at 14 Aug 2026 - by status

STATUS	AT 02 SEP 2026 (COMPUTED)	REGISTER'S VIEW, 14 AUG 2026	DIFFERENCE
Current	121	123	-2
Due 61-90 Days	13	11	+2
Due 31-60 Days	1	3	-2
Due 0-30 Days	6	26	-20
Overdue	48	26	+22
No Date	158	158	-
All assets on the register	347	347	-

Thresholds as the register applies them: overdue = past the due date; due 0-30 / 31-60 / 61-90 days; current = more than 90 days out; no date = no Calibration Due entered. In calibration = current + due 31-60 + due 61-90. Cross-check: applying the same thresholds at 14 Aug 2026 reproduces the register's own status on all 347 of its lines (0 differences) - the rule used here is the register's rule. The register's Live Register sheet also pads 108 blank template rows (a status formula, no asset) - excluded.

Ampol Calibration Register

AS AT 02 SEP 2026 18:30

Fell due since the due dates were last maintained - 14 Aug 2026 to 01 Sep 2026

22 assets passed the calibration due date between 14 Aug 2026, when the register workbook was last saved, and the SiteIQ pull. They count in the 48 overdue. A certificate issued in that window would not be on the register yet, so check the paperwork first: recalibrated means enter it in the Register Entry tab and this list shrinks on the next run; not recalibrated means a calibration run (in store) or a swap on next touch (on hire). Where SiteIQ has them at 02 Sep 2026 18:30: 19 in store, 2 not in SiteIQ, 1 on hire.

ASSET	DESCRIPTION	WAS DUE	OVER BY	WHERE AT 02 SEP 2026	WHO HAS IT

Over by = days past the due date at 02 Sep 2026 18:30, computed. Where = SiteIQ RENTAL_STOCK status: "In store" is SiteIQ's "Available for Hire"; "not in SiteIQ" means the asset number is not in the pull at all - whereabouts unknown until it is found and scanned. Nothing here is estimated.

Ampol Calibration Register

AS AT 02 SEP 2026 18:30

Due inside 30 days at 02 Sep 2026 - book these in now

6 assets fall due inside 30 days of 02 Sep 2026, soonest first, computed from Calibration Due. Booked in before the date lapses, these never touch the overdue list - that is the whole game. An asset out on hire gets its swap organised at the counter on next touch; the who-has-it column is SiteIQ's answer at 02 Sep 2026 18:30. For comparison, the register's own view at 14 Aug 2026 had 26 inside 30 days: 22 have since fallen due (page 5), 4 remain inside 30 days, and 2 have moved in from 31-60 days - 6 today.

ASSET	DESCRIPTION	CALIBRATION DUE	DAYS LEFT	WHERE AT 02 SEP 2026	WHO HAS IT
H033001-26	Torque Wrench 1/2" Drive 300 Nm	04 Sep 2026	2d	On hire	Daniel - Bartley
01498165-3	Torque Wrench 1" Drive 1,300 Nm	09 Sep 2026	7d	In store	-
05310434-28	Torque Wrench 3/4" Drive 900 Nm	09 Sep 2026	7d	In store	-
H0350004	Torque Wrench 3/4" Drive 680 Nm	09 Sep 2026	7d	In store	-
WG0001/006	Hydraulic Actuator	18 Sep 2026	16d	In store	-
WG0001/007	Hydraulic Actuator	18 Sep 2026	16d	In store	-

Days left are computed from Calibration Due at the SiteIQ pull time. A dash means the source holds no value for that cell - nothing here is estimated.

Ampol Calibration Register

AS AT 02 SEP 2026 18:30

Overdue and on hire at 02 Sep 2026 - the chase list, by name

8 overdue assets are out on hire at 02 Sep 2026 18:30 - register due dates joined to the SiteIQ RENTAL_STOCK pull (the register's own on-hire flag is page 8). 6 are with a hirer - a swap or recall on next touch - and 2 sit on the repairs account. Names A to Z, worst item first inside a name. SiteIQ's hire start date is later than the calibration due date on 5 of the 8 (red tag): either the item went out the counter after its date lapsed, or the register's due date is wrong - check both; the note below names them.

With a hirer - 6 items across 5 names and accounts

WHO HAS IT (SITEIQ)	ASSET	DESCRIPTION	WAS DUE	OVERDUE BY	OUT SINCE
David - Wood WOOD · 1 overdue item	SD0033-1	Torque Wrench 3/4" Drive 1,000 Nm	30 Jul 2026	34d over	07 Jan 2026
FCCU - 2026 (SFI) AMPOL REFINERIES (QLD) PTY LTD · 2 overdue items	WG0020/001	Torque Wrench 1/2" Drive 200 Nm	16 Jul 2025	413d over	07 Aug 2026 AFTER DUE
	H033001-34	Torque Wrench 1/2" Drive 300 Nm	25 Jul 2026	39d over	07 Aug 2026 AFTER DUE
Jannie - Cloete AMPOL · 1 overdue item	CTX169/003	Pressure Gauge Analog 2,500 kPa	15 Aug 2026	18d over	13 Jul 2026
Kaveni - Vunibola WOOD · 1 overdue item	CTX006/010	Pressure Gauge Digital 10,000 psi (68,000 kPa)	09 Aug 2026	24d over	27 Aug 2026 AFTER DUE
Romany - Prak WOOD · 1 overdue item	C0897-38	Pressure Gauge Analog 6,000 kPa	01 Jan 2025	609d over	15 Jan 2026 AFTER DUE

On the repairs account - 2 items - a repair-queue conversation, not a chase

WHO HAS IT (SITEIQ)	ASSET	DESCRIPTION	WAS DUE	OVERDUE BY	OUT SINCE
All-Around - Repairs Repairs · 2 overdue items	H033001-21	Torque Wrench 1/2" Drive 300 Nm	25 Jul 2026	39d over	09 Jul 2026
	WG0019/001	Torque Wrench 3/8" Drive 100 Nm	28 Jul 2026	36d over	11 Aug 2026 AFTER DUE

Hirers A to Z, worst item first inside a name; overdue by = days past the due date at 02 Sep 2026 18:30, computed. Out since = SiteIQ ON_HIRE_DATE for the current hire; the red tag marks a hire that started after the calibration due date. Every one of these is a counter conversation on next touch - swap organised, certificate sorted, no drama. Hire started after the due date: **C0897-38** (due 01 Jan 2025) went out to Romany - Prak on 15 Jan 2026 08:51, 379 days after its due date; **WG0020/001** (due 16 Jul 2025) went out to FCCU - 2026 (SFI) on 07 Aug 2026 14:39, 387 days after its due date; **H033001-34** (due 25 Jul 2026) went out to FCCU - 2026 (SFI) on 07 Aug 2026 14:39, 13 days after its due date; **WG0019/001** (due 28 Jul 2026) went out to All-Around - Repairs on 11 Aug 2026 09:14, 14 days after its due date; **CTX006/010** (due 09 Aug 2026) went out to Kaveni - Vunibola on 27 Aug 2026 13:25, 18 days after its due date.

Ampol Calibration Register

AS AT 02 SEP 2026 18:30

The register's own chase list at 14 Aug 2026 - for comparison

At its Last Refresh the register's own columns flagged **11 overdue assets as on hire** - 5 with a hirer, 6 on the repairs account. Checked against SiteIQ at 02 Sep 2026 18:30: **5** are back in store and **6** still out. Printed so the register's figure and the computed one can be read side by side; the list to work is page 7.

With a hirer - 5 items

WHO HAD IT (REGISTER)	ASSET	DESCRIPTION	WAS DUE	OVER AT 14 AUG 2026	WHERE AT 02 SEP 2026
Romany - Prak 1 overdue item	C0897-38	Pressure Gauge Analog 6,000 kPa	01 Jan 2025	590d over	On hire
FCCU - 2026 (SFI) 2 overdue items	WG0020/001	Torque Wrench 1/2" Drive 200 Nm	16 Jul 2025	394d over	On hire
	H033001-34	Torque Wrench 1/2" Drive 300 Nm	25 Jul 2026	20d over	On hire
Wayne - Toovey 1 overdue item	CTX006/009	Pressure Gauge Digital 10,000 psi (68,000 kPa)	29 Jul 2026	16d over	In store
David - Wood 1 overdue item	SD0033-1	Torque Wrench 3/4" Drive 1,000 Nm	30 Jul 2026	15d over	On hire

On the repairs account - 6 items

WHO HAD IT (REGISTER)	ASSET	DESCRIPTION	WAS DUE	OVER AT 14 AUG 2026	WHERE AT 02 SEP 2026
All-Around - Repairs 6 overdue items	C0808-14	Pressure Gauge Analog 1,000 kPa	02 Dec 2025	255d over	In store

Shelf list grouped by description and SitelQ bay so a calibration run can be batched; every asset number is printed. Overdue by = days past the due date at 02 Sep 2026 18:30, computed. Not-in-SitelQ rows show the register's own bay and on-hire flag at 14 Aug 2026 where it has one - nothing newer exists for them.

Ampol Calibration Register

AS AT 02 SEP 2026 18:30

No date - calibration status unknown until the certificate is entered

158 assets sit on the register with no calibration due date entered. Say it straight: their calibration status is unknown - the register cannot say whether they are in date, and neither can this report, until the certificate details are entered. They are not counted as failed and not counted as in date. 43 of them are out on hire at 02 Sep 2026 18:30 (high pressure 7, test bucket 5, pressure gauge 5, hydraulic ram 4). 16 are not in SiteIQ at all. 1 carries a serial number. Each certificate entered moves an asset from this page onto the dated fleet on page 3 - that is the fill-in work under way, and the on-hire ones come first.

Where they sit - No Date assets by SiteIQ bay at 02 Sep 2026, top 10 of 26

What they are - by item family, top 7 of 40

ITEM FAMILY (FIRST WORDS OF DESCRIPTION)	ASSETS	ON HIRE AT 02 SEP 2026
High Pressure	25	7
Hydraulic Ram	17	4
Test Bucket	12	5
Hydraulic Flange	12	1
Pressure Gauge	11	5
Hytorc Hydraulic	11	3
Hydraulic Porta	8	4

Family = the first words of the register description - a plain grouping, not a new classification. Bay = SiteIQ STORAGE_UNIT at the pull; an asset SiteIQ does not hold is counted under "not in SiteIQ". Nothing is guessed.

Ampol Calibration Register

AS AT 02 SEP 2026 18:30

On hire, not in the register - computed from the SitelQ pull

3,362 SitelQ lines are on hire at 02 Sep 2026 18:30 with no line on the calibration register - 3,438 on hire in the pull, less the 76 register assets among them - across 720 hirers. (The register's own sweep - its On Hire Audit sheet - listed 3,478 at its Last Refresh, 14 Aug 2026: a different day, printed for comparison only.) By construction that is the whole on-hire fleet less what the register holds; radios, gas monitors, phones and general tooling make up most of it and need no calibration certificate. The slice worth a look is the **64 rows** whose description reads like test or measuring gear - a keyword match, listed from page 13.

What is on hire unregistered - 3,362 rows by item family

Looks like calibration-type gear - keyword match, 64 rows across 15 hirers - verify before acting

KIND	ROWS	HIRERS	MOST COMMON DESCRIPTION
Fluke test and calibration gear	46	1	Pressure Gauge, Fluke 700G08 1000PSI (3)
Argon flowmeters and regulators	8	8	AMPOL ARGON FLOWMETER (4)
Torque wrenches and torque tools	5	4	AMPOL MILWAUKEE HIGH TORQUE IMPACT WRENCH 1" DRIVE M18 (1)
Calipers and feeler gauges	2	2	AMPOL FEELER GAUGE SET 300MM .05-1.00 (1)
Meters and testers	2	2	Pocket Weather Meter (1)
Pressure and other gauges	1	1	AMPOL ACETLENE GAUGE (1)

Keyword rule: the SitelQ description contains any of **Fluke, calibrat-, torque, gauge, multimeter, clamp / process / vibration / weather meter, tester, flowmeter, caliper, micrometer, vernier, thermometer, manometer, tachometer, megger**, and none of **Dräger / X-am / gas monitor, sling, chain block**. Excluded and counted separately: 543 gas-monitor rows (their own programme and report) and 138 sling and chain-block rows (25 chain blocks - lifting gear, the Rigging & Lifting Register report). A match is a prompt to check, not a finding.

Ampol Calibration Register

AS AT 02 SEP 2026 18:30

Looks like calibration-type gear, on hire and not in the register

64 rows on hire at 02 Sep 2026 18:30 match the keyword rule on page 12, grouped by description and hirer - 48 lines, every barcode printed, in the order of the kinds table on that page. Work it like the register's dashboard says: add it to the register or confirm it needs no calibration certificate. **Keyword match, verify before acting** - a Fluke connector or a hand pump matches the word, not the need.

Ampol Calibration Register

How the calibrated fleet is run

IN DATE OR IT STAYS IN

The standard: nothing goes out the counter with a lapsed certificate - Life Saving Rule 5, Tools and Equipment (SEQ-GL-009). This report checks the standard against the live SiteIQ pull and says so plainly when a hire started after the due date.

COMPUTED, NEVER REFRESHED

The register is the human-maintained list - asset, description, certificate, due date. Everything else on these pages is computed from the SiteIQ pull at the time printed on every page. No workbook refresh, ever.

NAMES AND ACCOUNTS, NOT CATEGORIES

An overdue asset on hire is chased with whoever SiteIQ says holds it - a person, a project account or the repairs queue - and each kind gets its own conversation at the counter.

HONEST ABOUT THE GAPS

No Date means the calibration status is unknown until the certificate is entered - said plainly, counted separately, never blended into a compliance score. Blanks print as dashes, **never** guesses.

Names as shown: the site is Ampol. SiteIQ still carries the site's former name on 3,136 live-register lines and the register on some descriptions; every one is shown here under the current name. Asset numbers and barcodes are identifiers and never change. Each run writes its figures to History\report_history.json keyed on the pull day; the next run reads them back for the movement notes. Trend page: appears once seven days are on record (1 today).

THE COATES WAY • OUR OPERATING MODEL, OUR STANDARD, OUR WAY

Australia's most trusted equipment partner - delivering Best Service & Value.

PURPOSE Supporting Australia's growth with leading equipment solutions.

Care Deeply (safety & wellbeing first, always) • **Customer Focused** (listen, anticipate, exceed expectations) • **Be Our Best** (accountability, learning, determination) • **One Team** (collaborative, trusted, inclusive) • **Competitive Spirit** (set stretch goals, be THE best)

SCORECARD Green - on track • Amber - at risk • Red - action needed: a documented root cause, corrective actions, an owner and a deadline.

WHERE THIS REPORT SITS Operational Excellence, Resilient Processes, Safety First, Cadence • a lapsed certificate is a stop-the-task risk; the register is the one standard record and every overdue asset has an owner and a date

Every figure in this report is counted from the SiteIQ exports named on its data page - nothing is estimated, weighted or typed in. Wording: The Coates Way, branch edition, July 2026.

Meet the tool store team

The crew running your Ampol store - keeping the register true, the certificates current and the gear ready. Something not right? Tell us and we'll sort it.
