POTENTIAL
SAVING / DAY

COST STREAM: SiteIQ invoicing only. Every dollar on this page bills through SiteIQ. The separate monthly invoice - radios, gas monitors, sub-hired welders and forklift, compressor, crib gear and its own transport - is tracked on its own page (button 49) and none of its dollars appear here. The two streams never share a figure.

Plant in use - by category, who has it and for whom

Off-hiring this gear saves \$585.94 per day. Sorted longest-sitting first - that is the conversation list.

Available on site - not in use (29 items): the maintenance window

If it's not in use, it comes back to the tool store. This list is the true-utilisation picture of the site plant fleet, and it is the Coates mechanic's preventative maintenance worklist - service gear while it sits idle, so it never fails in a contractor's hands (Life Saving Rule 5 - Tools and Equipment). Charging for these items has not started; as each one moves, the double-scan puts it on hire to its user, and on return to Site Plant Equipment (Coates).

Site infrastructure - barriers, chutes & hoppers (176 items)

Barriers, crowd control, rubbish chutes, hoppers and brackets stay on site for the duration of the shutdown by design - they are not idle plant, not a saving opportunity and not an issue. Listed for the record:

DESCRIPTION	TOTAL QTY
Barrier - Crash Rated Water filled - Armorzone	50

Life Saving Rules (SEQ-GL-009): Rule 5 - Tools and Equipment: damaged or defective plant is tagged out and removed from service, never reissued. Rule 6 - Critical Risk Non-Negotiables: mobile plant work follows the non-negotiable controls for that Critical Risk.

Honest limits: Idle plant is identified strictly by the site convention: on hire to hirer "Site Plant Equipment", company Coates - nothing else is counted as available-and-charged. Rates are contracted base rates (plant register rate used only where no contracted rate exists); items with no rate show a dash and are excluded from saving totals - never estimated, never \$0. Charged-while-idle is inclusive of the return day. Categories come from the K2 Plant Equipment register. All data reflects SiteIQ as at the data-as-at stamp above - this report is a point-in-time snapshot.

All returns go through the Coates tool store, handed to the stores team and double-scanned. Nothing is returned unless it is scanned.

Care Deeply · Customer Focused · Be Our Best · One Team · Competitive Spirit
