Cement Australia K2 Shutdown 2026 - Gladstone

Generated: 05 Aug 2026 14:41 | Data as at: 05 Aug 2026 12:08 (RENTAL_STOCK export file time) | Author: Andrew Fisher

KEY • ELECTRICAL / RIGGING test & tag current · tag colour BLUE • LOGBOOK daily pre-start & logbook entry • RETURN DAILY back to the tool store every shift

Gear that comes back the day it went out keeps the whole site moving - and this crew is doing it. 2549 of 4968 completed tool store transactions came back the same day (51%). Every return is inspected, double-scanned and stocktaken back to its shelf - the return isn't complete until we've looked. This is a leaderboard, not a blame list: the names below are the standard-setters.

The movement, day by day

Peak times - when the counter runs hottest

Issue and return events from SiteIQ's own stamps, site plant pool excluded - the counter's real workload.

Meet the tool store team

The crew running your K2 tool store - getting the right gear to the right crew, keeping it looked after and ready, and making sure everything that leaves the store is right. Day and night, so the shutdown keeps moving. Something not on hand or not right? Tell us and we'll sort it.

✓ The right gear to the right crew

✓ Looked after, maintained & ready

✓ Checked and right - every time

Honest limits: Transactions attributed by the company that ran them (EMPLOYER_NAME). Same-day = returned on the issue date. Gear that went on hire without a tool store transaction (e.g. plant delivered direct) counts on the on-hire and demob reports, not in these transaction figures - such companies appear here as 0-transaction rows. A positive report by design: it names good behaviour, never bad.

All returns go through the Coates tool store, handed to the stores team and double-scanned. Nothing is returned unless it is scanned.
