This one is yours. The client sees a scorecard that says the store is under control - here is the work that MAKES it true. **2,988 counts** have gone through the stocktake screen, 672 of them in the last 24 hours, and right now **37% of the 3,705 countable items are inside the 3-day cycle**. Your biggest single day so far: **694 counts on 26 Jul**. The wheel doesn't turn itself - it's turned by the people on this page.

The daily three — counted every single day

Three groups are on a DAILY count, not the 3-day wheel: gas monitors, radios and radio batteries. Gas monitors keep people alive, radios keep the site talking, and batteries are what walks. Every shelf unit in these three gets eyes on it every day - gear out with a crew counts as sighted at issue. Below is today's position and **exactly what was missed**.

What you've done — day by day

Counts landing per day over the last fortnight. Every bar is barcodes scanned, shelves walked and gear physically sighted.

The export keeps each item's NEWEST count only - as items get re-counted, earlier days fade from this chart. Recent days are the true read; the total above counts everything currently on record.

When the wheel turns - counts by shift window (SiteIQ stamps)

- Day window 06:00-18:00 1,615 54%
- Night window 18:00-06:00 1,373 46%

Day v night — the power board

DAY SHIFT 06:00–18:00

1,615 7,419

COUNTS LOGGED (54%) COUNTER EVENTS (62%)

4,271 / 3,148 12:00 (305)

GEAR OUT / GEAR BACK BUSIEST COUNT HOUR

17:00 (1700)

BUSIEST COUNTER HOUR

NIGHT SHIFT 18:00–06:00

1,373 4,531

COUNTS LOGGED (46%) COUNTER EVENTS (38%)

2,472 / 2,059 20:00 (858)

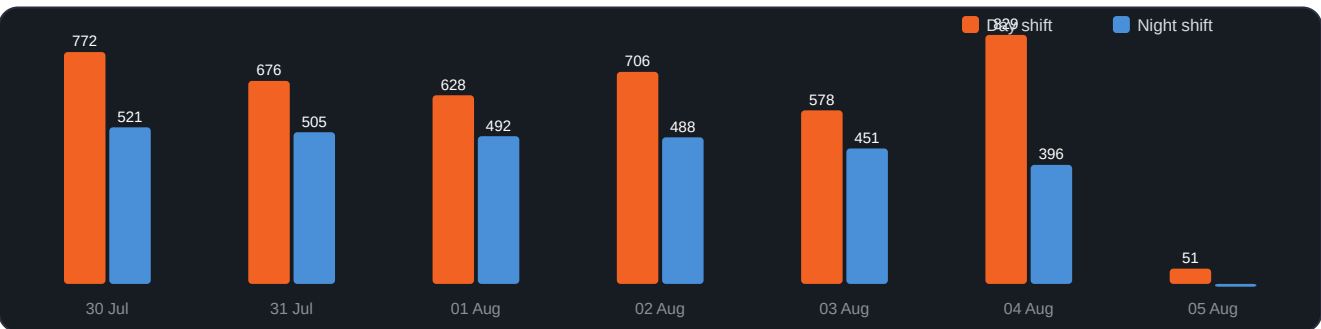

GEAR OUT / GEAR BACK BUSIEST COUNT HOUR

05:00 (1314)

BUSIEST COUNTER HOUR

The verdict: Day shift turns the wheel - 54% of all stocktake counts - and Day shift owns the counter with 62% of counter events (gear out and back). Different shifts, different strengths - the 70/30 count deal below plays to exactly that.

The counter, day v night, last 7 shift-days - every issue and every return with a time stamp on it.

Whole units, biggest first, always onto the lighter pile - swap by agreement, and if a unit's mid-count at handover, the next shift picks up where the last one left off: the wheel doesn't care whose torch it is. The Daily Run Sheet lists every due item with a tick box in walk order - print one per shift. This plan rebuilds from the freshest export every time the report runs.

The shelf and the field — right now

The live position your counting keeps honest: of 4,982 store fleet items, 765 are out working with 163 people holding gear in their own name and 4,212 sit ready on the shelf - and a deep, counted shelf is the whole promise: nobody waits for a tool at this window. (277 site infrastructure items - plant, barriers, chutes - are out on charge besides.)

4,982

STORE FLEET ITEMS

765

OUT WORKING NOW

4,212

READY ON THE SHELF

163

PEOPLE HOLDING GEAR

deepest list: 41 items

STORAGE UNIT	FLEET	OUT WORKING	READY	READY RATE

KEY • ELECTRICAL / RIGGING test & tag current · tag colour BLUE • LOGBOOK daily pre-start & logbook entry • RETURN DAILY back to the tool store every shift

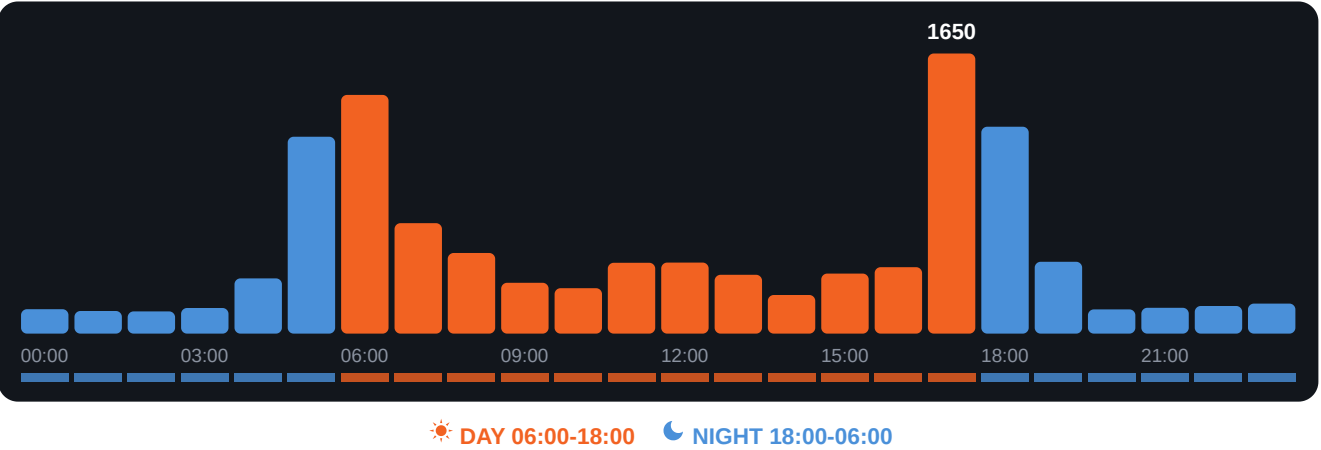

Day shift takes the round, 6-0. Night crew - 4,321 counter events to 6,901 is the cruiser run. Enjoy it while it lasts. Either way: one store, one team - the scoreboard's for bragging rights, the gear's for the job.

Gear value = master-file replacement cost of items issued in each window; 1,242 issued item(s) carry no master price yet and are left out of the dollars, never guessed.

When the counter runs hot — and when it sleeps

Every stamped counter event this shut - issues, returns and consumable draws, by hour of day

The rush: 17:00 · 1650 events 06:00 · 1406 events 18:00 · 1219 events

The lull: 00:00 to 04:00 barely moves - that's the window for restocks, counts and getting ahead of the next rush. The quiet hours are working hours too, just quieter ones.

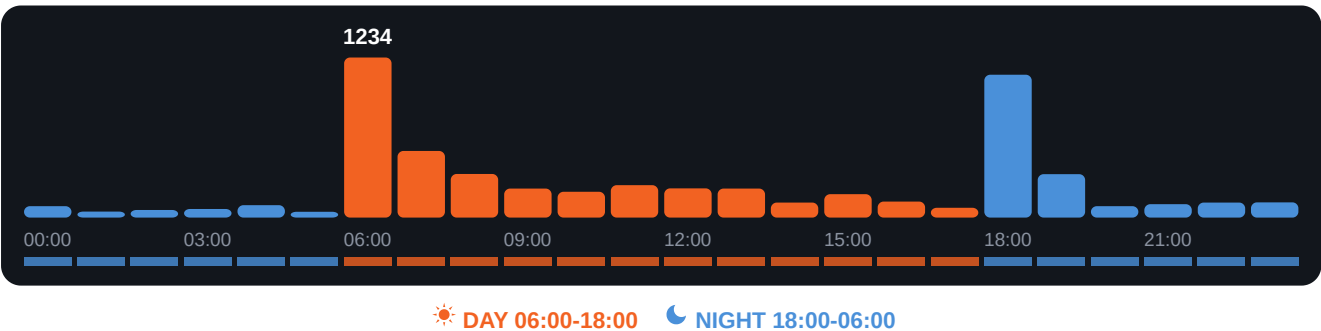

Hour by hour — the shift ledger

Four stories, one clock: stocktake counts, gear out, gear back and consumable sales, each by the hour it was stamped. Orange bars are day-window hours, blue are night's.

Consumables through the window

Not just the tooling - the shelf moves too. 348 draws in day hours v 191 at night.

☀ What day shift lives on

TAPE - BARRIER 'DO NOT ENTER' BLACK/RED/WHIT		26 draws
RESPIRATOR - P2 DISPOSABLE 8822 - K2/26		25 draws
BUCKET - UTILITY PLASTIC 20L WHITE (WITH LID)		24 draws

🌙 What night shift lives on

OVERALL - TYVEK CHEMICAL RESISTANT HOODED XX		37 draws
BUCKET - UTILITY PLASTIC 20L WHITE (WITH LID)		30 draws
TAPE - BARRIER 'DO NOT ENTER' BLACK/RED/WHIT		19 draws

Safety never knocks off

The store's Life Saving Rule - Tools and Equipment: "I will only use tools and equipment that are fit for purpose and for which I am trained, competent and authorised. I will ensure that damaged or defective equipment is tagged out and removed from service." That rule lives at this counter: damaged gear? Over the counter, tagged out, no questions - that's the system working, not a telling-off.

The high-care kit keeps its own rules: 0 gas monitor movements through the counter this shut - every monitor on the daily bump-test rule before it works - and 1,025 radio movements, serial-tracked in the holder's name. And Fit for Work stands every shift: right PPE, fit to be on the tools, day window or night.

Meet the tool store team

The crew running your K2 tool store - getting the right gear to the right crew, keeping it looked after and ready, and making sure everything that leaves the store is right. Day and night, so the shutdown keeps moving. Something not on hand or not right? Tell us and we'll sort it.

AF

Andrew Fisher

SHUTDOWN MANAGER

andrew.fisher
@coates.com.au

Oversees the whole store and the whole shutdown -
anything at all, start here

TM

Thomas Maher

DAYSHIFT LEAD

✓ The right gear to the right crew

✓ Looked after, maintained & ready

✓ Checked and right - every time

Honest limits: Counts are sightings logged with the Stocktake action in the SiteIQ STOCKTAKE export. The export keeps each item's LATEST sighting only, so day-by-day figures read 'items whose newest count landed that day' - a fair floor on the real effort, never an inflation. ALL shift credit follows SiteIQ's own time stamps against Andrew's windows - work stamped 06:00-18:00 is day-shift work whoever did it, 18:00-06:00 is night's, and a night shift belongs to the day it STARTS. The roster on the team page is who people are, never how work is credited. Session pace counts runs of 3+ counts with gaps under 5 minutes. Store traffic comes from the TRANSACTIONS export (duplicates dropped, the site idle pool excluded) plus consumable draws from SALES_STOCK; shift splits use SiteIQ's own time stamps against Andrew's windows - day 06:00-18:00, night 18:00-06:00 - and events without a stamp are counted in totals but never guessed into a shift. The live shelf-and-field position reads RENTAL_STOCK (fleet + status, site infrastructure split out) and ON_HIRE (current holders by name) - the pack stands on all five SiteIQ exports.
