KEY • **ELECTRICAL / RIGGING** test & tag current · tag colour **BLUE** • **LOGBOOK** daily pre-start & logbook entry • **RETURN DAILY** back to the tool store every shift

PAGE 1 OF 13

Safety-critical gear gets a different level of care, and this report is the evidence. The 30-unit gas monitor fleet is pooled through the store - every monitor bump tested and fully charged before it is issued, never a partial charge, never an out-of-date unit. 72 radio handsets are managed the same way (70 in the working pool, 2 held as spares), with batteries charge-checked on every return - flat means on charge before ready. Milwaukee tooling is tracked piece by piece for its high replacement value. Life Saving Rules (SEQ-GL-009) sit under all of it - Rule 5, Tools and Equipment: anything damaged or defective is tagged out, photographed and removed from service on the spot. Never left on the shelf. Never reissued.

## Today's safety conversation

### TODAY'S SAFETY CONVERSATION

TOPIC 10 OF 20

## 10. Grinder Guards, Handles and Discs

Before using a grinder, confirm the guard and handle are correctly fitted and the selected disc is suitable for the grinder, task and operating speed. Inspect the disc for damage and never use equipment with a removed guard, damaged lead or faulty switch. Establish a safe position and control the direction of sparks and fragments. Coates checks grinders before issue, but the user must inspect the complete setup before every use.

**The correct grinder with the wrong disc is still the wrong tool.**

Supports Coates Life Saving Rules (SEQ-GL-009) · **Rule 5 - Tools and Equipment**

Compliance on hire — what has to be checked

COMPLIANCE ON HIRE RIGHT NOW

|                                 |                              |                              |                      |                              |
|---------------------------------|------------------------------|------------------------------|----------------------|------------------------------|
| 143<br>ELECTRICAL · BLUE<br>TAG | 259<br>RIGGING · BLUE<br>TAG | 60<br>PRE-START &<br>LOGBOOK | 199<br>BACK<br>DAILY | 658<br>LINES WITH A<br>CHECK |
|---------------------------------|------------------------------|------------------------------|----------------------|------------------------------|

Every line below carries its own requirement. Anything showing a tag colour must be checked before use; anything showing a logbook or return line must be actioned that shift.

Every hire line on every report in this pack now carries its own requirement underneath the item name. That removes the ‘nobody told me’ conversation at the counter, and it gives the Coates team the detail they need to check gear over before it goes back out. Blank means the master file has nothing to declare for that item — never a guess.

Eyes on the fleet. 2336 of 4336 counted items physically sighted inside the window by 4 counters - daily stocktakes, no exceptions, and the count doubles as on-hire verification.

Diphoterine emergency rinse - chemical splash response

New capability at the store. 32 single-use emergency chemical-splash rinse units are held for issue to Cement Australia crews - sterile, sealed, date-controlled first-aid gear for corrosive splash, checked against the physical stock. These are not tools: the return check is unused, sealed and in date - anything else is an incident, not a return.

PREVOR DIPHOTERINE® SIEW / LIS Individual Eye Wash 50 mL

Single-use sterile emergency eye rinse for corrosive/irritant chemical splash

SDS rev 4.1 · 02 Dec 2022 · review due 02 Dec 2027

Scan the QR - the SDS downloads straight to your phone.

PREVOR DIPHOTERINE® MICRO DAP Autonomous Portable Shower 100 mL

Single-use sterile micronised spray for corrosive/irritant chemical splash to skin (approx. 3% TBSA)

SDS rev 5 · 03 Aug 2022 · review due 03 Aug 2027

Scan the QR - the SDS downloads straight to your phone.

The process at the counter: sign one out at the store (sign-out sheet at the counter), carry it sealed, and hand it back the same way - unused, sealed and in date. ANY USE = INCIDENT - a used unit means a chemical splash has happened: first aid comes first, then notify the Cement Australia site supervisor and the Coates tool store immediately so the unit is replaced and the incident is recorded. Not for hydrofluoric acid or fluorides in acidic medium - Diphoterine has limited action there; confirm the chemical with the Cement Australia supervisor if in doubt. Full SOP, issue register and quick-scan board live at the store.

Hazardous substances — the SDS register

Every chemical on the shutdown store shelf is registered with a current Safety Data Sheet — 11 substances, each verified to the manufacturer's official SDS with a QR link at the shelf (as at 23 Jul 2026). Nothing goes on the shelf without one. This is doing our part before anyone has to ask.

## Log Books

Using Coates plant? **Fill in the log book. Every machine, every shift.**

PLANT & EQUIPMENT  
SITE NOTICE

-  **Before you start** Find the log book on the machine and do your pre-start check. Write it in **before** you operate. No pre-start, no start.
-  **Every shift, every operator** A new line at the start of every shift, and every time the operator changes. Date, name, start and finish hours or kilometres.
-  **Faults and damage** Something not right? Write it in straight away, tag the machine out of service and tell Coates. Don't leave it for the next crew.
-  **Fuel, fluids and servicing** Record refuelling and any fluid top-ups. If a service is coming due, note the reading and let Coates know so we can book it in.
-  **Keep it with the machine** The log book lives in its holder on the machine — dry, legible and complete. Missing or full? Call Coates for a new one before the machine goes to work.
-  **Sign it** Print your name and sign. The log book is the record of the machine's condition and of your check — it protects you, your crew and whoever is on it next.

### If it's not in the log book, it didn't happen.

Two minutes at the start of your shift. It keeps the machine safe and everyone on it safe.

This notice supports **Coates Life Saving Rule 5 — Tools and Equipment (SEQ-GL-009)**: "I will only use tools and equipment that are fit for purpose and for which I am trained, competent and authorised. I will ensure that damaged or defective equipment is tagged out and removed from service." The log book is how you show it. If you're not sure about a machine, stop, tag it out and call your Coates contact.

Coates · Equipped for anything | Issued 25 Jul 2026 | Author: Andrew Fisher, Shutdown Manager QLD & NT

### Meet the tool store team

The crew running your K2 tool store - getting the right gear to the right crew, keeping it looked after and ready, and making sure everything that leaves the store is right. Day and night, so the shutdown keeps moving. Something not on hand or not right? Tell us and we'll sort it.
