PAGE 1 OF 8

This one is for the Cement Australia store team - your consumables shelf as the tool store sees it, straight from scanned draws and the live SiteIQ stock position. **54 lines are stocked** on the shelf right now, 0 of them under min/max management. Crews have made **75 draws** (364 items issued) this shutdown - every one through the counter and the double scan. **1 line needs attention**: 1 out, 0 running at or under minimum - the reorder list below runs worst-first so the top of the list is today's order.

What we need - reorder list (worst first)

ITEM	ON HAND	MIN	TO GET BACK TO MIN	SITEIQ REORDER QTY	USED THIS SHUT	STATUS
OIL - PENETRATING PENETRENE 500ML - K2/26	0	0	-	-	10	OUT

'To get back to min' is simple arithmetic (minimum minus on hand) - the call on how much to order is yours. A dash in SiteIQ Reorder Qty means no reorder quantity is set on that line in SiteIQ.

Meet the tool store team

The crew running your K2 tool store - getting the right gear to the right crew, keeping it looked after and ready, and making sure everything that leaves the store is right. Day and night, so the shutdown keeps moving. Something not on hand or not right? Tell us and we'll sort it.

✓ The right gear to the right crew

✓ Looked after, maintained & ready

✓ Checked and right - every time

Honest limits: Quantities only - no consumables pricing is loaded, so no dollar values appear. Shelf position and usage are from the SALES_STOCK export at the data-as-at stamp; draws are scanned facts. 'To get back to min' is minimum minus on hand, never a forecast. Lines with no minimum set can't be flagged LOW - set minimums in SiteIQ to put them under management.

All returns go through the Coates tool store, handed to the stores team and double-scanned. Nothing is returned unless it is scanned.

Care Deeply · Customer Focused · Be Our Best · One Team · Competitive Spirit
