PAGE 1 OF 5

Every item in the tool store gets physically sighted at least every 3 days - that's the stocktake wheel, and it turns right through to the end of the shut on 11 Aug 2026. Right now **83% of the 3,180 countable items are on the cycle**; 545 are due a count, led by Tooling (461 due). 1436 items were sighted in the last 24 hours by Adam Boyce, Andrew Fisher, Cody Mitchell, Thomas Maher. Gear on hire (488 items) counts as sighted - it was physically in someone's hands when it was issued - and the on-hire assurance check below makes sure nothing rides that rule quietly. With 14 days to go there are 4 full passes of the store left before handover.

Cement Safety		100%

Coverage counts the items sighted inside the last 3 days against everything that lives in that unit right now. On-hire and departed gear is excluded from the count - on-hire gear was sighted when it was issued, and departed gear has left site.

What gets counted next — the formula

The formula, in plain terms: an item is DUE when its last sighting is more than 3 days old. The run order is worst unit first (lowest coverage), oldest items first inside each unit. Clearing today's 545 due items puts the whole store back on the wheel; after that, roughly a third of the shelf (~1,060 items) each day keeps it there through to 11 Aug.

PRIORITY	STORAGE UNIT	ITEMS DUE	OLDEST	WHEN
1	Tooling	461	6d	Today
2	Welding	40	11d	Today
3	Consumables - Cement	10	10d	Today
4	Air	19	6d	This cycle
5	Electrical	14	10d	This cycle
6	Radios	1	6d	This cycle

The Daily Run Sheet in today's Reports folder lists every due item with a tick box, in this order - print it, walk it, scan the counts into SiteIQ.

On-hire assurance — nothing rides the rule quietly

488 items are out on hire. On-hire gear counts as sighted - it was physically handled when issued and every return is double-scanned - but the check here is for gear that could have been missed: anything on hire with no sighting for more than 7 days earns an eyes-on with the hirer at the next natural touchpoint. Right now: 280 sighted inside 3 days, 205 at 4-7 days, 3 past 7 days.

ITEM	STORAGE UNIT	SINCE SIGHTED	LAST SIGHTED BY
Extension Lead - 240V 15A • ELECTRICAL	Electrical	11d	Thomas Maher
Chain Block - Air Operated - 1t/10M Drop • RIGGING	Rigging	11d	Thomas Maher
Chain Block - Manual - 2.0t/6M Drop • RIGGING	Rigging	11d	Thomas Maher

These aren't lost - they're on hire and working. The ask is simply an eyes-on next time we're near that crew, so the record stays fresh.

Meet the tool store team

The crew running your K2 tool store - getting the right gear to the right crew, keeping it looked after and ready, and making sure everything that leaves the store is right. Day and night, so the shutdown keeps moving. Something not on hand or not right? Tell us and we'll sort it.

✓ The right gear to the right crew

✓ Looked after, maintained & ready

✓ Checked and right - every time

Honest limits: Sightings come from the SiteIQ STOCKTAKE export as at the newest sighting in the file (27 Jul 2026 13:01); a sighting is any physical scan - stocktake, arrival, issue or return. On-hire items are excluded from the countable base (sighted at issue) and covered by the assurance check instead. Departed gear (pending branch receipt) is not counted or shown. Site plant, barriers, chutes and laydown belong to the plant world and are audited on the Plant Audit List, not here. Shut end 11 Aug 2026 is the working date - the cycle plan moves with it.

All returns go through the Coates tool store, handed to the stores team and double-scanned. Nothing is returned unless it is scanned.

Care Deeply · Customer Focused · Be Our Best · One Team · Competitive Spirit
