This one is for the people behind the counter. A shelf the crews never think about is a shelf being run WELL - and that's what this page shows. 54 consumable lines are stocked, 28 of them moving this week. 86% of the consumable lines in the stocktake wheel were checked inside the last 7 days, with 9 lines worth a recount below. Nothing that moves is out of stock. That's the job, done well.

'System now' keeps moving with every draw AFTER the check, so a small gap is the shelf living, not a miss. Only a gap that's big in both units and proportion earns a recount - and a recount isn't a fail, it's the system working.

Days of cover — how long the shelf lasts

Cover = what's on hand divided by the line's average daily draws over the last 7 days. Under 3 days lands a line on the watch list; lines with no draws this week aren't scored - no movement, no risk.

Every moving line holds 3+ days of cover. That's a shelf run properly - the fast movers below are the ones that keep earning it.

28 moving lines sit comfortably above the line - checked, stocked, no action needed.

When the shelf gets hit

Consumable draws by hour of day - every scanned draw this shut

The shelf's quiet window runs 20:00 to 06:00 - that's the restock window. Fill the hooks in the lull and the rush never meets an empty one. And the PPE on these hooks IS the Fit for Work rule in stock form - gloves, glasses and plugs on the shelf keep every shift working safe.

Keeping an eye on it — the three glances

Morning glance: the watch list above - anything under 3 days of cover gets ordered before smoko. **Midday glance:** the fast movers (RESPIRATOR - P2V FLATFOLD CARBON - K2/26, SAFETY TAG - INFORMATION - K2/26, SAFETY TAG - PERSONAL ISOLATION - K2/26) - they burn hardest and empty fastest. **Close-of-shift glance:** tomorrow's first-hour lines - gloves, blades, tape - stocked tonight so the 06:00 rush never meets an empty hook. SiteIQ minimums are already set on 0 lines; this page just makes the walk faster.

Meet the tool store team

The crew running your K2 tool store - getting the right gear to the right crew, keeping it looked after and ready, and making sure everything that leaves the store is right. Day and night, so the shutdown keeps moving. Something not on hand or not right? Tell us and we'll sort it.

✓ The right gear to the right crew

✓ Looked after, maintained & ready

✓ Checked and right - every time

Honest limits: Shelf position and minimums come from the SALES_STOCK export; draws are scanned counter movements from the same export. Burn and cover use the last 7 days of draws - lines with no draws this week are not scored. Check coverage and the match rate come from consumable lines in the STOCKTAKE export; counted-v-system gaps allow for draws made after the check, and only a gap big in both units and proportion is flagged for a recount. Where no consumable checks exist the page says so instead of guessing. Nothing here is an automatic order or charge.

All returns go through the Coates tool store, handed to the stores team and double-scanned. Nothing is returned unless it is scanned.
