

Utilisation — plant, tool store and consumables

Cement Australia K2 Shutdown 2026 · Gladstone

21% of the fleet is out right now · 33% has moved at least once

We hold 5,380 items on this site. 1,156 are with a crew as you read this. Since the shut started, 1,758 have gone out at least once — which leaves 3,622 (67%) that have not moved a single time in 21 days.

Two numbers, two questions. Out right now is a snapshot — how hard the fleet is working today. Has ever moved counts anything that has gone out once since 13 Jul 2026 — what we mobilised that has never earned its freight. They are not interchangeable, and cutting a fleet on the wrong one is how a store runs out of something it just sent back.

PLANT

TOOL STORE

BY STORAGE UNIT — HOW MUCH OF EACH AISLE IS OUT

BY STORAGE UNIT — HOW MUCH HAS EVER MOVED

STORAGE UNIT	ITEMS	OUT NOW	EVER MOVED	NEVER MOVED	READING

NEVER MOVED — 3,622 ITEMS

Read this one carefully before acting on it. "Never moved" means the barcode has not been charged, has not been recorded going out without charge, and is not on hire right now. Some of it is spares we are right to be holding — a store with no spare grinder is a store that stops a job. The list is here to be argued with, not actioned blind.

on the shelf all job

SAYS "STOCK LOW" — BUT THE COUNT FOUND STOCK

Do not order these. The system has them at zero, the stocktake found gear on the shelf. Post the count in SiteIQ and the flag clears.

ITEM	SKU	SYSTEM SAYS	COUNT FOUND
BATTERY - AAA 1.5VDC ALKALINE PROCELL - K2/26	CEME9016-590675	0	2

WIPES - INDUSTRIAL ULTRAGRIME PK100 - K2/26	CEME9016-590729	0	1

DO WE NEED TO ORDER?

Where this comes from. SiteIQ has minimum and reorder fields, which is where a reorder point belongs — on this job **every one of them is set to zero**, so there is no trigger to read. These lines are worked out from what actually went out the window: how fast each one is going since it first moved, against the **8 days** left to 11 Aug 2026. Nothing here is a guess at what we might use; it is the rate we are already using.

WORTH WATCHING — TIGHT BUT NOT SHORT

ITEM	ON SHELF	GOING OUT	LASTS
Rain Jacket Set Coat And Pants	2	0.2/day	8 days
BATTERY - AA 1.5VDC ALKALINE SUPER HEAVY DUTY - K2/26	13	1.6/day	8 days
Pelican Pick	6	0.6/day	10 days

WAS THE COUNT RIGHT?

56 of 57 lines counted — 98%. Counted on 28 Jul 2026, 30 Jul 2026, 31 Jul 2026, 01 Aug 2026, 02 Aug 2026, 03 Aug 2026. A count taken before today should differ from today's stock if gear went out since, so anything sold after the count is taken off before a line is called wrong. Today that explains **0** of them — the other **7** are real gaps.

HOW THIS WAS WORKED OUT

"Used" is three signals, not one. A barcode counts as used if it was charged, OR recorded going out without a charge, OR is on hire right now. Charged lines alone would report every radio on this job as never moved — they go out free-issue and never touch the charge sheet. Reading only the charge sheet put radios at 0%; reading all three puts them at their real 80%.

Counted from the charge feed: **1,381** barcodes charged, **858** more moved without a charge, **9,619** shifts charged in total.

Status of everything we hold. Available for Hire **4,213** · On Hire **1,156** · Failed Baseplan **11**
